Lancaster Farming

Vol. 19 No. 14 | Lancaster Farming, Saturday, February 23, 1974 | $2.00 Per Year

# FARM TRENDS by Dick Wanner

### How Short Is Fertilizer?

A recent Wall Street Journal report on the fertilizer situation has very little to comfort any farmer who hasn't already locked in his supply for the coming year. Some producers, according to the report, say the U S. will be short about five percent of its total needs.

The Fertilizer Institute in Washington, the producer's trade group, says the shortage will be more like 15 percent, or three million tons. Corn yields, alone, it says, will fall 20 million to 25 million tons short of requirements as a result. On the other hand the U.S. Department of Agriculture's chief economist, Don A. Paarlberg, while agreeing that production of nitrogen fertilizer "is running full out," accuses the fertilizer industry and farmers of "magnifying their estimates of need." He says, "Crop production won't be crippled this year."

The reason for the fertilizer problem is twofold. First, there was an oversupply of fertilizer until a year ago, as a result construction of new fertilizer plants virtually halted. Second, now that it has become apparent that new fertilizer production is needed, the industry says it can't build new plants because it isn't able to get long-term guarantees of supplies of natural gas, a raw material essential for the production of nitrogen fertilizer.

Because of the fertilizer situation, crop forecasts for 1974 may be far off, the fertilizer industry warns. The Agriculture Department predicts corn production this year of 6.7 billion bushels, up from 5.6 billion bushels last year. It predicts wheat production of 2.1 billion bushels, up from 1.7 billion. Edwin Wheeler, president of the Fertilizer Institute, says there is simply no way to meet the corn-production estimates (corn uses 55 percent of U.S. nitrogen-fertilizer production). He says the wheat and cotton estimates are also doubtful.

The corn outlook is worse than the wheat outlook, Mr. Wheeler says. One reason is that when farmers planted their winter wheat last fall "they got the first lick at our nitrogen-fertilizer supplies and have almost preempted the corn farmer," Mr. Wheeler says, "Wheat has already soaked up a lot of our nitrogen-

# Agricultural Fuel Outlook is Cloudy

Will you be able to get enough fuel to plant and harvest your 1974 crops? The best answer we could get to this question after two days on the phone this week is a qualified "Probably."

The Federal Energy Office has decreed that farmers and related agribusiness pursuits are to get all the fuel they need. Dealers locally say they're only too aware of the regulations, and will be happy to comply - if they have the fuel available.

Most farmers we talked to reported they were having no trouble yet in getting fuel. There were some indications of trouble, though, particularly in operations which were expanded recently.

A farmer in the southern end of the County said he had just added more than 200 acres of cropland to his operation. "I'm not quite out of gas. We've got some storage capacity on the home farm, but we're going to be working that pretty hard after we start planting. We've been trying to get another storage tank, but that hasn't come yet.

"Our problem is that we're down to about a two-day supply once we start plowing. Other years, that might not be a problem, because we could call up our dealer and he'd be out here in anywhere from one to 12 hours. They're not delivering that fast anymore." And, he says he's running out of gas."

In trying to contact this man's dealer, we discovered that his phone had been disconnected. We were able to reach a number of dealers, and we were unable to reach others. There is a lot of pressure on oil dealers, from farmers and others who buy fuel, which is just about everybody. Oil dealers, these days, are a harried lot and some aren't answering their phones.

"The Federal Energy Office is telling farmers they're supposed to be able to buy fuel through their regular channels," one dealer told us. "Well, we're a regular channel, and we don't know where we're going to get the gas. So how's the farmer supposed to get it from us?"

# Double-Crop Beans For Higher Profit

"Lancaster County farmers could double or triple returns from their small grain fields by double-cropping soybeans," John Yocum told a Crops and Soils Day audience on Tuesday at the Farm and Home Center. "This is a livestock county," Yocum explained, "so you need straw for bedding and you've got to grow a small grain to get it. But you don't have to let the field idle after you cut the the grain." Yocum is director of Penn State's Southeast Research Center at Landisville.

Many small grain fields in the area lie idle from the time the crop is harvested in June until the following spring, when they are usually planted to alfalfa. "Instead of leaving the land idle, why not put it to work?" Yocum asked. "We figure that a break even point in soybean production is a 12-bushel-per-acre yield, or 16 bushels if you have to buy fertilizer. Average yield is 25 bushels; and at $5 a bushel, you can see why double-cropping makes good sense."

Yocum recommends planting as early as possible, preferably before June 10,

### *Organic Living Column Begins*

**A new weekly column dealing with organic gardening, natural foods and pollution control begins this week on page 16. "Organic Living" is written by Robert Rodale, editor of Organic Gardening and Farming magazine, and publisher of Prevention, a health magazine, and Environment Action Bulletin.**

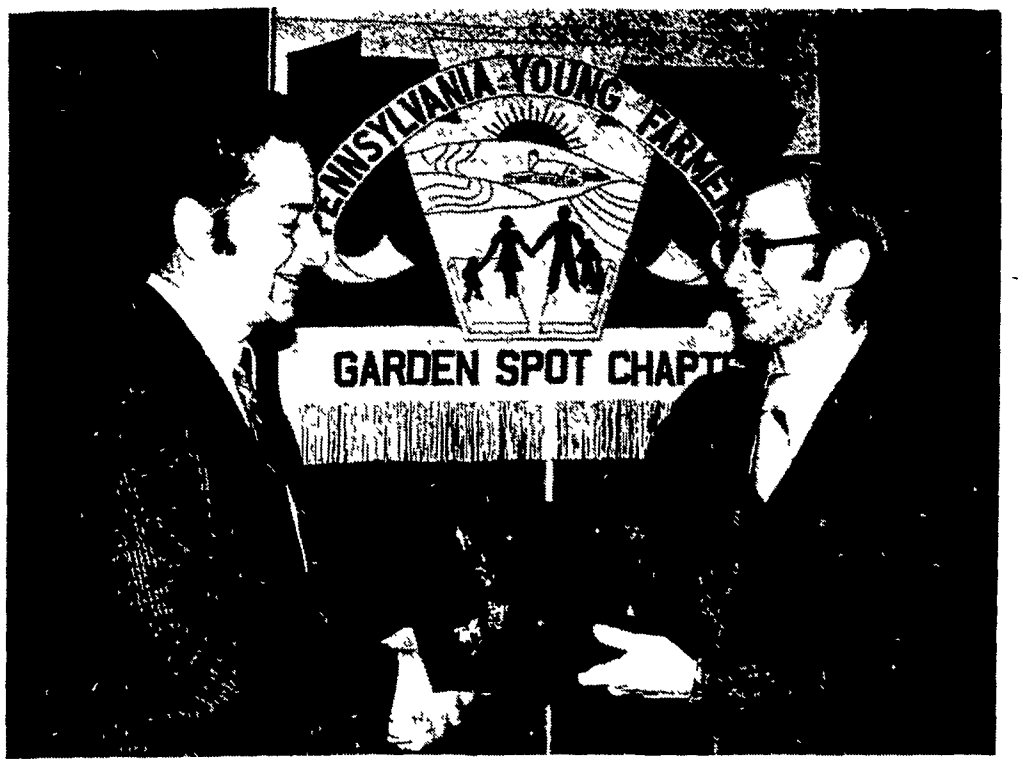
# *Wentink Named NCEN Chairman*

Henk Wentink

Hendrink "Henk" Wentink, assistant to the president of Lancaster's Pennfield Corp., was named chairman of the National Commission on Egg Nutrition at a meeting of that group last Monday in Park Ridge, Illinois.

Wentink is a new member of the commission, and represents the Northeastern Poultry Producers Council. He succeeds Blanton Smith, Nashville, Tenn., as chairman.

Other members of the commission are Smith, who represents the American Egg Board; Gerald Bookey, Seattle, Wash., representing the Pacific Egg and Poultry Association; Maurice Pickler, New London, N. C., representing Southeastern Poultry and Egg Association, and Norman Hecht, Walden, N. Y., representing United Egg Producers.



Monroe Good, left, was named the outstanding farmer of the year by the Garden Spot Young Farmers Association at their annual meeting last Friday night at the Blue Ball Fire Hall. Donald Robinson, the group's advisor, presented the award.

# Garden Spot Young Farmer Group Meets

Monroe Good, East Earl RD1, was given the Outstanding Farmer of the Year award by the Garden Spot Young Farmers Association at their annual banquet last Friday evening at the Blue Ball Fire Hall. Donald Robinson, the group's advisor, presented the award to Good.

The Outstanding Dairy Achievement award went to Robert Book, 11 Hershey Road, Leola. The Book herd scored a production record of 15,874 pounds of milk and 610 pounds of fat.

First place corn silage award went to Earl S. Weaver, New Holland RD1, for his production record of 14,725 pounds of TDN per acre. Andrew Stoltzfus, Morgantown RD1, placed second with 13,244 pounds of TDN, Carl Sauder, East Earl RD1, was third with 13,200 pounds and Glenn C. Her-

# Local Livestock Market, Auction News

## Lancaster Market

**Monday, February 18**

| | Cattle | Calves | Hogs | Sheep |
|---|---|---|---|---|
| Today | 461 | 173 | 631 | 176 |
| Last Mon. | 1019 | 179 | 715 | 160 |
| Last Year | 565 | 135 | 1173 | 104 |

CATTLE: There were 379 head sold in afternoon auction. Auction was not reported due to holiday.

## Local Grain

**Thursday, February 21**

These prices are made up of the average prices quoted by five participating local feed and grain concerns. It should be noted, however, that not every dealer handles each commodity. All prices are per bushel except ear corn which is per ton.

The average local grain prices quoted Thursday, February 21, 1974, are as follows:

| | Bid+ | Offered+ |
|---|---|---|
| Ear Corn, New | 71.00 | 80.00 |
| Shelled Corn | 3.11 | 3.36 |
| Oats, Local | 1.45 | 1.90 |
| Oats, Western | 2.12 | 2.29 |
| Barley | 2.55 | 2.78 |
| Wheat | 4.82 | 4.89 |
| Soybeans | 5.85 | 6.00 |

+Bid is the price the dealer will buy from the farmer delivered to the mill. Offered is the price the dealer will sell for at his mill.

## New Holland Dairy Auction

**Wednesday, February 20**

Reported receipts of 49 cows, and two bulls. Market lower than last week's market.

Load Pennsylvania cows, fresh 570-795; springers 600-800.

Load New York State cows, fresh 550-770.

Locally consigned cows 375-900.

Springing heifers 445-515.

Bulls 500-565.

## Vintage Auction

**Tuesday, February 19**

| | Cattle | Calves | Sheep |
|---|---|---|---|
| Today | 558 | 591 | 6 |
| Last Tue. | 922 | 586 | 8 |
| Last Year | 920 | 552 | 8 |

CATTLE: Compared to last Tuesday, slaughter steers uneven, Choice and Prime 950-1300 lb. 50-150 higher, weights over 1300 lb. steady to strong, Standard and Good strong to 50 higher; cows 50-150 lower after a few early sales mostly steady; bulls 50-1.00 higher.

SLAUGHTER STEERS: High-Choice and Prime 1050-1250 lb. 49.75-50.75, six head 51.00-52.00; Choice 950-1300 lb. 49.00-50.60, few 50.60-50.85; Choice 1300-1400 lb. 47.00-50.00, 1450-1600 lb. 46.00-47.50; high-Good and low-Choice 1100-1350 lb. 46.50-48.00; Good 43.75-47.25; Standard and low-Good 40.50-43.25.

COWS: Utility and high-dressing Cutter 35.00-36.50, few 36.50-37.50, with about 10 head early 38.00-38.75; Cutter 34.00-36.00; Canner and low-Cutter 30.50-33.75.

BULLOCKS: Good 850-1200 lb. 44.25-46.50, couple Choice 49.00, with an individual 52.00.

BULLS: Yield grade 1 1200-1700 lb. 46.75-49.00, couple 49.50-50.00; yield grade 2 1000-1500 lb. 42.50-45.50.

VEAL CALVES: Vealers mostly steady, with slaughter calves 1.00-3.00 higher. Supply included 72 bought to arrive.

VEALERS: Prime 80.00-83.00, couple 84.00-85.50; Choice 73.00-80.00; Good 63.00-72.00; Standard 55.00-63.00; Utility 90-120 lb. 46.00-55.00, 65-85 lb. 37.00-48.00.

SLAUGHTER CALVES: Choice 350-475 lb. 50.00-55.00, few 56.00-63.50; Good 45.00-50.00.

RETURNED TO FARM: Bulk 80-100 lb. Holstein heifers 58.00-61.00, one lot 100-105 lb. 70.00 and seven head 110-125 lb. 83.00-83.50; bulk 90-125 lb. bull calves 68.50-74.00.

## Lebanon Valley Livestock

**Tuesday, February 19**

**Cattle 384**

Compared with last Tuesday's market, slaughter steers grading Standard & Good 50 cents to $1 lower. Slaughter cows $1.50 to $3 lower. Slaughter bulls & bullocks steady to weak. Few Choice slaughter steers 46.00-48.10, Good 44.35-46.60, Standard 41.75-43.75, few Utility 38.75-40.50. Few Standard & Good slaughter heifers 40.10-43.25. Utility & High Dressing Cutter slaughter cows 34.50-36.85, Cutters 32.85-35.85, Canners 30.50-33.10. Few Choice slaughter bullocks 47.00-48.60, Good 44.10-47.60, Standard 42.50-44.10, few Utility 40.00-41.25. Yield Grade 1-2 1400-2000 pounds slaughter bulls 44.25-47.85, individual at 48.75.

**Calves 198**

Few Choice vealers 72.00-75.50, Good 66.00-72.00, few Standard 55.00-65.00, Utility 90-120 pounds 46.00-55.00, 70-85 43.00-46.00. Farm calves, Holstein bulls 85-130 55.00-78.00; Holstein heifers 85-130 85.00-110.00.

**Sheep 10**

Few Good 80-100 pounds wooled slaughter lambs 35.00-37.00. Few Slaughter ewes 18 00-23.00.

## Oklahoma City

**Thursday, February 21**

| | |
|---|---|
| Estimated Receipts Same Day | 6,000 |
| Last Week Same Day | 10,502 |
| Last Year | 9,090 |

Moderately active after a slow start, feeder cattle and calves uneven, about steady with the weeks decline; majority receipts Good and Choice 400-750 pound steers and 400-650 pound heifers; moderate attendance buyers; heavy snow and near blizzard conditions at this time.

FEEDER STEERS: Small lot choice 349 pound at 59.00; Choice 400-500 50.50-56.00; 500-600 46.25-48.75, few 505-531 49.25-50.90 and small lot and part load 503-506 53.25-53.30; 600-700 45.25-48.00; 700-800 45.00-46.50; 800-850 43.00-45.80; Mixed Good and Choice 330-500 49.75-53.75; 500-700 43.50-46.25; 700-910 42.00-44.25; Good 390-500 44.00-47.50; 500-800 40.75-45.00; Good 550-909 Holstein steers 39.30-43.00.

FEEDER HEIFERS: Few Choice 343-377 pound 46.80-49.00; 400-500 43.00-46.50; 500-600 41.00-44.30, small lot 586 at 44.90; 600-700 40.00-43.50; load 731 at 39.90; mixed Good and Choice 300-500 40.50-45.00; 500-700 39.00-41.00; Good 485-721 35.75-40.00.

For the week: Feeder cattle and calves mostly 2.00-3.00 lower, some sales 4.00-4.50 lower compared to late last week; slaughter cows recovered part of the early loss to close 50 cents to 1.00 lower; bulls generally steady. Salable receipts near 12,400 head compared to 17,839 last week and 14,311 the comparable period a year ago. Cows 15 percent cattle receipts; feeders 85 percent of total.

## Lancaster Auction

**Wednesday, February 20**

| | Cattle | Calves | Hogs | Sheep |
|---|---|---|---|---|
| Today | 529 | 84 | 596 | 12 |
| Last Week | 235 | 125 | 386 | 21 |
| Last Year | 689 | 110 | 485 | 16 |
| Wed.'s Auction | 438 | 106 | 597 | 35 |
| Last Wed.'s Auction | 235 | 132 | 469 | 35 |

CATTLE: Trend on slaughter steers not comparable, market not reported Monday and insufficient volume last Wednesday; cows 50-1.50 lower, most decline on Utility; bulls mostly steady, instances 1.00 lower on yield grade 1.

SLAUGHTER STEERS: Couple lots Prime 1075-1250 lb. 47.50-48.10; load high Choice and Prime 1400-1550 lb. 43.60-46.50; Choice 975-1250 lb. 47.85-48.60, one lot 49.50; high Good and low Choice 46.00-47.50; Good 43.50-45.50; Standard and low Good 40.50-43.00, few 38.75-40.00.

SLAUGHTER HEIFERS: Choice 850-1025 lb. 46.00-47.25, couple 47.85; Good 800-1000 lb. 42.00-45.00.

COWS: Utility and high dressing Cutter 34.25-35.60, few 35.75-36.60; Cutter 33.00-35.00; Canner and low Cutter 31.50-33.25.

BULLOCKS: Good 850-1250 lb. 43.60-46.00, couple Choice 46.75-47.85.

BULLS: Yield grade 1 1100-1700 lb. 45.00-46.75, few 46.85-48.35, individual 49.60; yield grade 2 1000-1500 lb. 42.00-45.50.

VEAL CALVES: Vealers fully steady.

VEALERS: Prime 80.00-82.00, 15 260-295 lb. from one lot 83.00-88.00; Choice 72.00-80.00; Good 65.00-71.00; Standard 58.00-62.00.

RETURNED TO FARM: Bulk 90-120 lb. 60.00-72.00, few 73.50-79.50.

SHEEP: One lot Prime 75-80 lb. new crop lambs 69.00, four head Utility and Good slaughter ewes 18.00-20.50.

## New Holland Auction

**Thursday, February 21**

| Last Year | 808 | 502 | 3 |

CATTLE: Compared to last Thursday, slaughter steers very uneven, Choice 950-1150 lb. yield grade 2-3 steady to weak, Choice 1100-1300 lb. yield grade 2-4 1.00-2.00 lower, with instances of Choice yield grade 3-4 1275-1350 lb. 2.00-4.00 lower; Standard and Good 50-1.00 lower; cows 50-1.00 lower; bulls and bullocks 1.00-3.00 lower.

SLAUGHTER STEERS: Choice 950-1150 lb. 47.75-50.50, six head 50.75-51.00, Choice 1050-1300 lb. yield grade 2-4 46.75-48.50, few 1250-1350 lb. yield grade 3-4 44.50-46.75; high-Good and low-Choice 1000-1250 lb. 44.50-47.75; Good 42.50-45.00; Standard and low-Good 38.75-42.45.

SLAUGHTER HEIFERS: Few head Choice 850-975 lb. 45.00-45.50.

COWS: Utility and high-dressing Cutter 34.00-36.60, few 36.75-37.60; Cutter 33.50-35.25; Canner and low-Cutter 31.00-33.50.

BULLOCKS: Choice 900-1250 lb. 44.00-46.50, couple 46.75-47.00; Good 42.00-44.00.

BULLS: Yield grade 1 1000-1700 lb. 43.50-46.50, couple 47.00-48.60; yield grade 2 1000-1500 lb. 40.00-43.50.

VEAL CALVES: Vealers 1.00-2.00 higher, instances 4.00 higher on Prime.

VEALERS: Prime 83.00-88.00, few 88.00-82.00; Choice 75.00-83.00; Good 65.00-75.00; Standard 58.00-65.00; Utility 90-120 lb. 42.00-50.00, few 50.00-54.00, 65-85 lb. 38.00-45.00.

SHEEP: No market test.

**Monday, February 18, 1974**

Calf Receipts 98.

Choice and Prime 73-87; Standard 54-66.50; Good and Low Choice 67-72.50; Common 38-53.50.

## Composite Report

**Weekly, February 22**

| | Cattle | Calves |
|---|---|---|
| This Week | 2700 | 1325 |
| Last Week | 3403 | 1349 |
| Last Year | 3289 | 1352 |

CATTLE: Slaughter steers very uneven, sales early part of the week 50-100 higher, with closing prices generally dull except Choice 950-1150 lb. yield grade 2-3, these closing the week steady to weak, other grades and weights 1.00-2.00 lower; cows 50-1.00 lower; bulls and bullocks 1.00-3.00 lower. Supply included an estimated 45 per cent slaughter steers, 30 per cent cows, 10 per cent bulls, with the balance mainly feeder steers.

SLAUGHTER STEERS: High-Choice and Prime 1050-1250 lb. 49.50-50.75, few on Wednesday 47.75-50.00; Choice 950-1300 lb. 47.50-50.50, few mainly yield grade 2 50.50-52.00; Choice 1300-1400 lb. 44.50-49.50; high-Good and low-Choice 44.50-48.00; Good 42.50-46.50; Standard and low-Good 38.75-43.00.

SLAUGHTER HEIFERS: Choice 850-1025 lb. 45.00-47.25, couple 47.85; Good 800-1000 lb. 42.00-45.00.

COWS: Utility and high-dressing Cutter 34.00-36.60, few 36.75-37.60; Cutter 33.00-35.25; Canner and low-Cutter 31.00-33.50.

BULLOCKS: Choice 850-1250 lb. 44.00-46.50, few 46.75-47.85; Good 42.00-45.00.

BULLS: Yield grade 1 1000-1700 lb. 43.50-46.75, few 46.75-49.00, with a couple 49.50-50.00; yield grade 2 1000-1500 lb. 40.00-45.50.

VEAL CALVES: Vealers mostly steady, although Choice and Prime closed 2.00-4.00 higher.

VEALERS: Prime 80.00-88.00, with a few late sales 88.00-92.00; Choice 73.00-83.00; Good 63.00-75.00; Standard 55.00-65.00; Utility 90-120 lb. 44.00-55.00, 65-85 lb. 37.00-48.00.

SLAUGHTER CALVES: Choice 350-475 lb. 50.00-55.00, few 56.00-63.50; Good 45.00-50.00.

# HAY MARKETS

## PAUL Z. MARTIN

**Wednesday, Feb. 20**

36 loads of Hay and Straw sold as follows:

Alfalfa 59-71; Timothy 30-47; Mixed Hay 35-66; Straw 44 50-49.

## REGIONAL

**Monday, February 18, 1974**

(All hay No. 2 and better prices paid by dealers at the farm price per ton.)

Hay steady to $5 lower, Straw steady.

| | |
|---|---|
| Alfalfa | 55.00-65.00 |
| Mixed Hay | 40.00-50.00 |
| Timothy Hay | 35.00-40.00 |
| Straw | 35.00-40.00 |
| Mulch | 17.00-26.00 |

## NEW HOLLAND

**Monday, February 18**

95 loads of Hay and 32 loads of Straw sold as follows (prices per ton)

Mixed Hay 32 00-51 00, 20 loads 54 50-88 00, few loads 24 00-43.00, Straw 41 00-47 00, few loads at 52 00; Corn, 5 loads 73 00-80 00, Oats $2 35 per bushel, Barley $2 50 per bushel

## GREEN DRAGON

**Friday, February 15**

102 loads hay including: Alfalfa 55.00-84.00; Timothy 30.00-39.00, one load 46.00; Mixed hay 34.00-68.00; Clover, few loads 37.50-47.00; Blue Grass hay, one load at 42.00.

36 loads straw 45.00-50.00.

Corn, seven loads 77.00-81.50.

**CONTROL CATTLE LICE**

**with WARBEX* Pour-On**

WARBEX breaks the life cycle of lice during the feeding stage . . . before they reach egg-laying maturity Single treatments offer long-lasting protection, with no set-back to cattle.

WARBEX is easy to use, because it's ready to use. No spraying, no dipping, you simply pour it along the animal's back.

Lice-free cattle gain faster, convert more feed into more beef, can quickly return more than your investment in WARBEX.

***WARBEX really works.***

# New York Dressed Meats

**Thursday, February 21**

Daily distributive - less than carlot meat trade.

Compared with Wednesday: Steer and heifer beef fully $2.00 lower. Veal, calf and lamb steady to weak, listed pork cuts unevenly $1.00 to $3.00 lower.

Moderate to small supplies of red meats meeting narrow demand. Pork movement mostly fair. Tonnage going to volume buyers sharply off for the week particularly regarding beef. Reports indicate inventories of fabricated boxed beef are lessening as meat purchases for next week arrival running close to normal.

**Steer Beef**

Prime 600-900 pounds 75.00-77.00; Choice 600-700 75.00-77.00; 700-800 72.00-76.00; 800-900 70.00-75.00; Good 500-800 71.00-74.00.

**Heifer Beef**

Good 500-800 pounds 71.00-74.00.

**Calf**
**150-350 Pounds**

Choice 100.00-104.00; Good 93.00-96.00; Standard 86.00-90.00.

**Veal**

Choice 90-150 pounds 118.00-120.00; Good 60-90 112.00-115.00; Standard 60-120 90.00-96.00.

**Lamb**

Choice and Prime 30-55 pounds 85.00-86.00; 55-65 82.00-84.00.

**Choice Beef Cuts**

Hinds (steer) 145-190 pounds 83.00-86.00; Arm Chucks 90-105 70.00-73.00; Ribs (7-rib) 34-40 83.00-88.00; Loins (trmd) 50-70 100.00-105.00; Rounds (steer) 70-95 86.00-91.00; Full Plates 40.00-42.00; Hinds (heifer) 120-170 81.00-85.00.

**Fresh Pork Cuts**

Loins (reg.) 8-14 pounds 84.00-87.00; 14-17 81.00-84.00; Picnics (reg.) 4-8 68.00-72.00; Spareribs 3 pounds down 82.00-87.00; Hams (skinned) 14-17 70.50-72.50; 17-20 66.00-69.00.

Lightweight killers 17-20; heavyweight 21-24.

Mare ponies 20-45; colts 8-15; geldings 15-35; larger ponies 55-95.

## FHA Announces Additional Funds For Farm Loans

An additional 2.5 million has been allotted for Farm Operating Loans to Pennsylvania farmers according to Penrose Hallowell, State Director of the Farmers Home Administration. This raises the total allotment to 7 million dollars for operating purposes besides a 5 million dollar allotment for farm real estate loans to the end of the fiscal year, June 30, 1974.

"We want to assure," stated Hallowell, "that required credit is available for the production of food and other agricultural products. The new Youth Loan Program and the new program of guaranteeing farm loans of other lenders has increased the demand for FHA funds."

Hallowell stated that private lenders such as banks, Federal Land Banks, Production Credit Associations, insurance companies, commercial and private lenders provide the major credit source for farmers. He emphasized that farmers must first exhaust all possibilities of obtaining credit from such sources before coming to the Farmers Home Administration.

Loan processing through the Farmers Home Administration is handled on a local basis by 27 county offices in Pennsylvania

## Peoria Cattle

**Thursday, February 21**

Cattle: Receipts this week 5600, compared to last week 4461, and to a year ago 5487.

## Delmarva

Wednesday, February 20

Broiler-Fryer Market

Ready to cook movement continues fair though often disappointing despite lower asking prices. Slaughter schedules irregular ranging heavy to light depending on needs. Less than trucklot prices ranged 2-3 cents lower on both plant and US Grade A live supplies ample Undertone weak and unsettled.

Negotiated trucklot prices 2-3 lb. ready to cook broiler-fryers for delivery next week: Plant Grade 35.

Pool trucklot prices for Thursday arrival: US Grade A 37-42, mostly 38; Plant Grade 36-40, mostlh 37.

## Fuel Outlook

(Continued From Page 1)

A farmer told us that he'd stopped using his tank at home to fill his personal car, because he wanted to conserve his supply for plowing and planting. Not all farmers have taken that route, though, and at least one dealer is mad about it.

"I delivered 150 gallons to a farm last month, and the other day he called me up and asked for another 150 gallons. I know he wasn't using it for farming. The guy has three cars in his garage, and that's where the gas is going"

Another dealer told us, "We've got to be judge and jury when a farmer comes to us for fuel. We're supposed to give him everything he needs, and he's supposed to tell us what he needs. What if he says he needs twice as much as he used last year? What if he hasn't bought any more land? What if he says he's going to use it all for farming and I know he's not going to? Am I supposed to call that man a liar?"

The dealer's dilemma is heightened by an apparent shortage of form FEO 17. Dealers who need more fuel for farm customers are instructed to fill out FEO 17 and send it to the Federal Energy Office in Philadelphia. And a farmer who's turned down by a dealer has been instructed to get an FEO 17 from the local Agricultural Stabilization and Conservation Service office, and give it to his dealer who will in turn forward it to the FEO. The local ASCS office, however, reports that they don't have any forms The state office is getting some printed, and these should be available within a week.

or others, FEO 17 is not a problem. One dealer told us he could choke an elephant with his stack of FEO 17's, and Congressman Edwin Eshelman's Lancaster office said they could get all they wanted. A spokesman for the Congressman said that farmers could call that office if they need the forms.

Technically, farmers aren't supposed to fill out the forms unless they're trying to get more fuel than they used last year. But many dealers are requiring farmers to fill the forms out before they agree to sell any fuel at all And we heard one rumor that the FEO is rejecting all requests for more than a 20 percent increase in supply, which lets expanded operations pretty much out in the cold

Rumors, charges and counter-charges, of course, abound in the present fuel situation. An Elizabethtown farmer told us his dealer has been having trouble supplying him for months. "I was in the dealer's office one day and his district representative for the oil company called. He told my dealer there wasn't any more gas available until the end of the month, January. My dealer talked to this gentleman for awhile, and it turned out that there was gas available, but it was available at 58-cents a gallon"

There have been other reports of gas available at a price, usually around 61-cents a gallon This price, we were told by one dealer, reflects the world market price for gasoline. Distributors can buy this high-priced product, mix it with their domestic supplies and pass the cost increases along to customers

Delivery schedules may pose a problem for farmers, who have come to rely on almost instantaneous delivery. Dealers are starting to deliver in days instead of hours, so the farmer who lets himself run bone dry may find himself unable to do any fieldwork for a few days

All dealers we talked to said they would do all they could to supply farmers' needs, and many added that they were worried about the potential for abuses in a system that depends a great deal on the honesty of individual farmers.

No dealer would comment on the outlook for fuel prices, but we did get the feeling they were headed upward. So when you get fuel - and you probably will - it'll be expensive.

## Crouse Herd Jan. Production

Milk and butterfat production levels established by Registered Holstein cows in this area have been reported by Holstein-Friesian Association of America. All cows are from the herd of Galen W. Crouse, Len Lyn Farms, Stevens, RD1, enrolled in the DHIR official testing program.

Cows recognized for their exceptional food producing ability are:

Lownesdale Ginger Ida Drum, age 7-4, 27,930 pounds milk, 911 pounds fat, 3.3 percent test in 349 days milked; 25,450 milk 809 fat, 3 2 percent test in 305 days.

Millview Della Gent Faith, 3-4, 21,690 milk, 806 fat, 3.7 percent test in 354 days.

Len-Lyn Maxim Angie-OC, 3-2, 20,810 milk, 778 fat, 3.7 percent test in 365 days.

Len-Lyn Memory Lady, 7-1, 23,150 milk, 735 fat, 3.2 percent test in 349 days.

Gil-Lad Greta Hope, 5-7, 17,110 milk, 725 fat, 4.2 percent test in 310 days.

Tuscaview Zeus Radiant Sadie, 7-2, 19,090 milk, 720 fat, 3.8 percent test in 308 days.

Len-Lyn Maxim Flair, 3-3, 18,860 milk, 628 fat, 3.3 percent test in 309 days; 18,700 milk, 621 fat, 3.3 test in 305 days.

Len-Lyn Milk and Honey Leila, 5-3, 18,430 milk, 621 fat, 3.4 percent test in 339 days.

Lu-Pa Reflector Iris, 2-4, 16,720 milk, 594 fat, 3 6 percent test in 305 days.

Len-Lyn Maxim Symbol, 2-3, 17,170 milk, 564 fat, 3.3 percent test in 305 days

Rich-Anna Bright Star, 5-11, 17,680 milk, 550 fat, 3 1 percent test in 321 days; 17,470 milk, 543 fat, 3 1 percent test in 305 days

D-T-Y Reflector Donella, 7-10, 16,380 milk, 526 fat, 3 2 percent test in 305 days

Len-Lyn Perry Trinket 2-3, 15,870 milk, 477 fat, 3 0 percent test in 305 days

Lownesdale Nig Ginger, 9-6, 19,280 milk, 740 fat, 3 8 percent test in 305 days

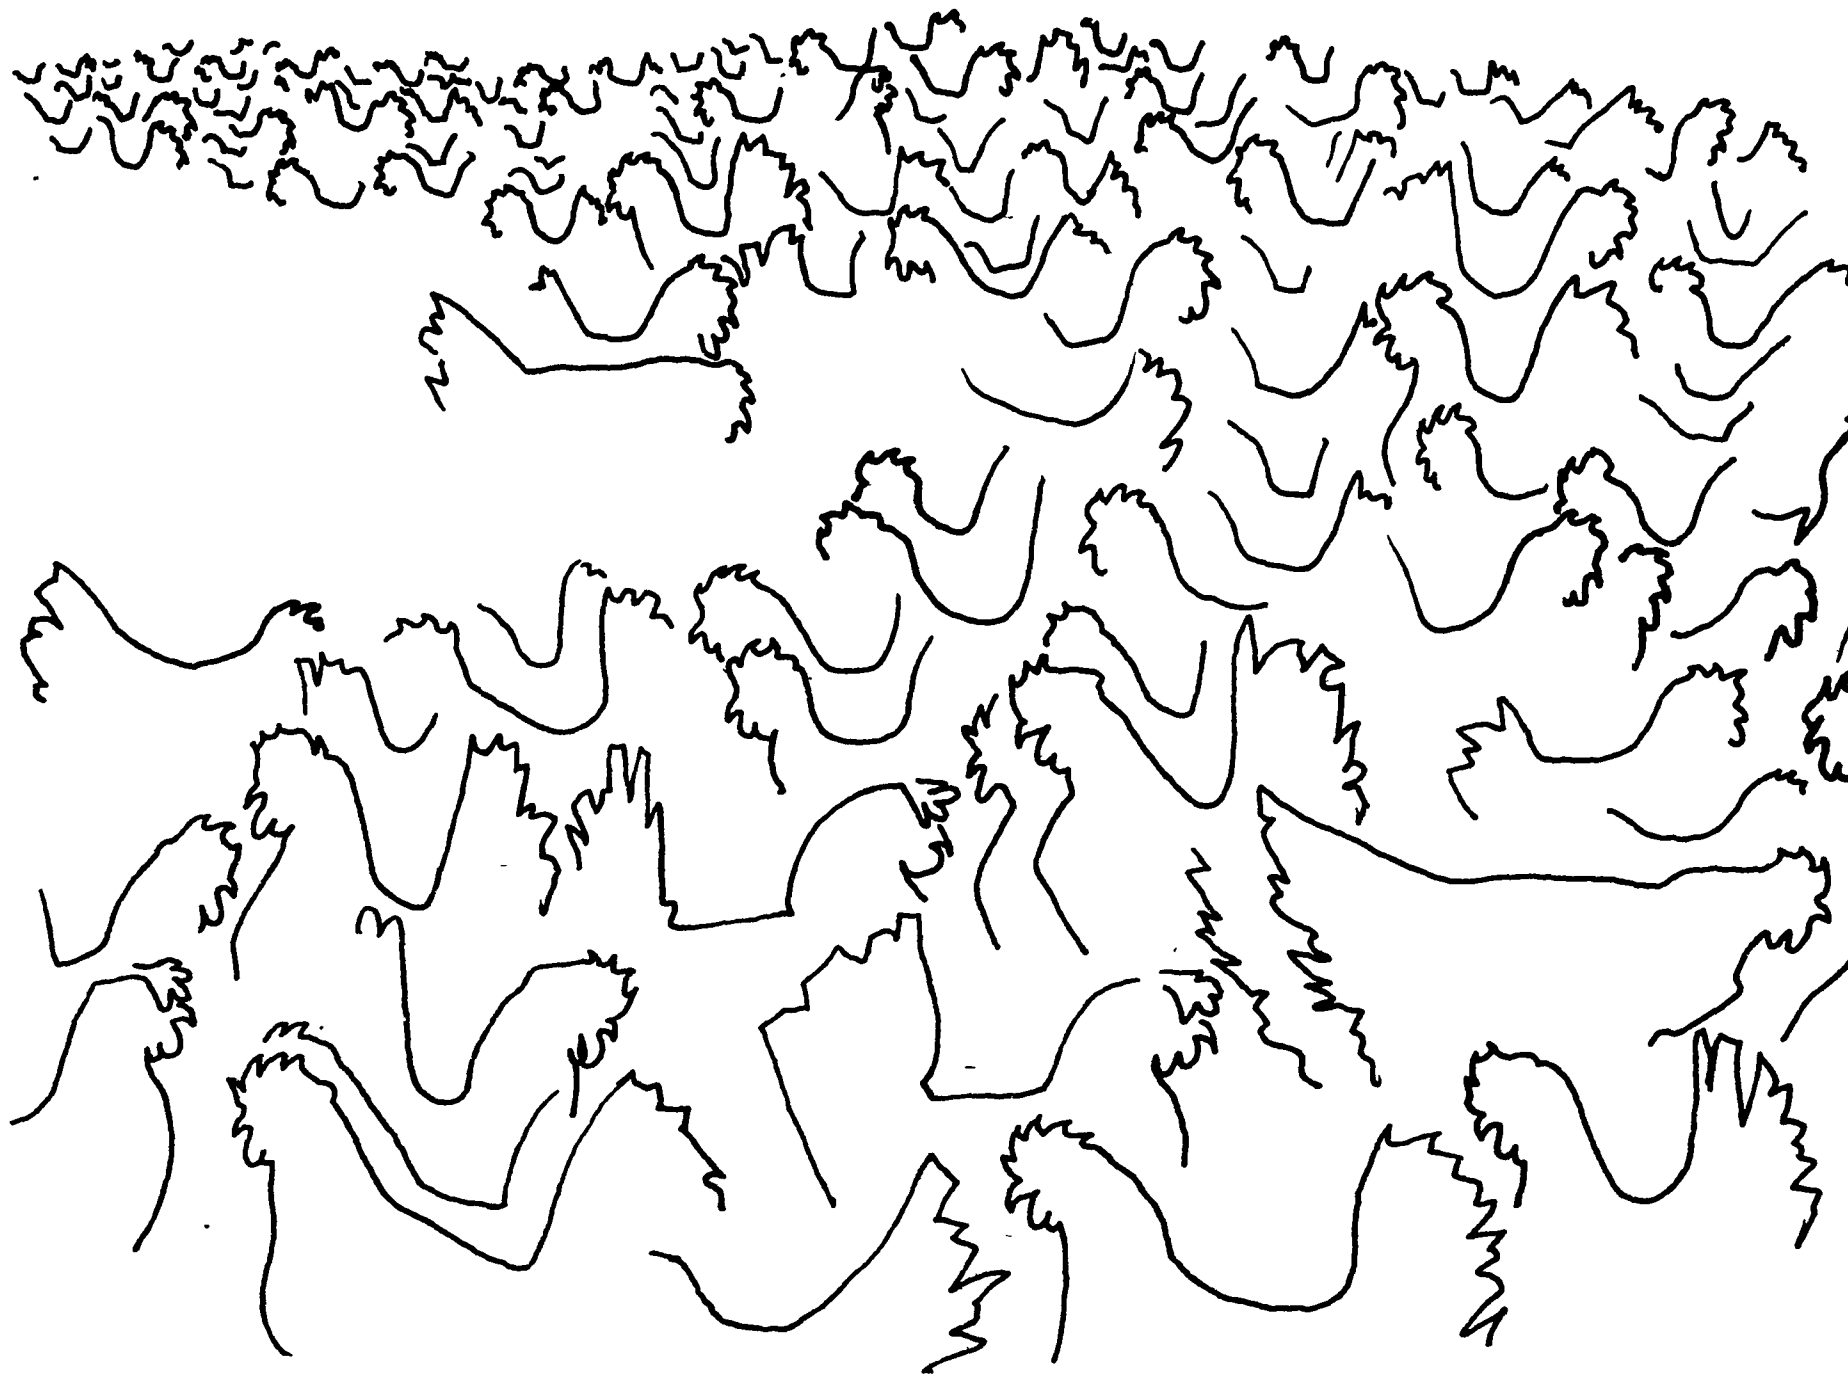
# Set the records straight for these birds



Keeping good records is a vital part of a successful poultry operation. And Pennfield's Computer Flock Analysis is designed to do that for you.

With the help of the Pennfield computer, all the information you need to make intelligent decisions to run your poultry operation is compactly printed on one computer sheet.

The records are so clearly stated, you can use them to help you obtain credit from the bank.

Pennfield's computer records are accurate and complete enough to use for tax purposes. Make them your record keeper and keep your records straight.

At your invitation, a Pennfield area manager will answer all your questions about Computer Flock Analysis.

# Pa. Auction Summary

**Weekly Summary**
**19 Livestock Markets**
**Week Ending February 15**

CATTLE 5763. Compared with 7147 head last week, and 5935 head a year ago. Compared with last week's market, slaughter steers weak to $2 lower, instances $3 lower. Slaughter heifers $1 to $2 lower. Slaughter cows highly uneven, spots $1 higher to $1.25 lower, with end of week showing most decline. Slaughter bullocks $1 to $2 lower. Slaughter bulls steady to $1 lower.

STEERS: High Choice & Prime 1050-1300 pounds 48.75-50.35, Choice 47.50-49.75, few to 51.00, Good 44.25-47.00, few to 47.50, Standard 41.50-44.25, Utility 39.00-41.50.

HEIFERS: Choice 44.50-47.00, Good 42.50-44.50, Standard 39.00-42.00, Utility 37.00-39.50.

COWS: Utility & High Dressing Cutter 35.85-38.00, few to 40.00, Cutters 33.75-36.00, Canners 31.00-34.00, Shells down to 27.00.

BULLOCKS: Choice 44.75-47.00, few to 50.00, Good 43.00-45.50, Standard 42.00-43.75, Utility 39.00-42.00.

BULLS: Yield grade 1-2 950-1200 pounds 39.00-45.00; yield grade 1-2 1200-2200 42.00-48.00.

FEEDER CATTLE: Good 300-900 pounds feeder steers 44.00-48.50, few Good & Choice to 57.00; Good 270-700 feeder heifers 42.00-52.00.

CALVES 3937. Compared with 2357 head last week, and 3786 head a year ago. Vealers mostly steady to $3 higher.

VEALERS: Prime 80.00-85.00, Choice 74.00-80.00, Good 68.00-75.00, Standard 58.00-68.00, Utility 90-120 pounds 45.00-53.00, 70-85 40.00-45.00. Farm calves active, Holstein bulls 90-130 52.00-71.00; Holstein heifers 85-150 62.00-90.00, few to 125.00.

HOGS 7043. Compared with 6233 head last week, and 5908 head a year ago. Barrows & Gilts highly uneven, steady to strong, although most sales weak to $4 lower.

BARROWS & GILTS: US 1-2 200-240 pounds 42.75-43.75, few to 45.00, 1-3 200-245 42.00-42.75, 2-3 200-260 41.50-42.25, 2-4 240-300 37.50-41.00, 2-4 150-190 37.00-39.00.

SOWS: US 1-3 300-575 pounds 34.00-39.50, 2-3 300-650 32.00-37.50. Boars 25.00-30.00, few to 34.00.

FEEDER PIGS 971. Compared with 319 head last week, and 625 head a year ago. US 1-3 20-35 pound feeder pigs 15.00-22.00 per head, 1-3 35-50 22.00-31.00, 1-3 50-100 28.00-33.50, Utility 20-60 13.50-27.00 per head.

SHEEP 398. Compared with 411 head last week, and 647 head a year ago. Wooled slaughter lambs steady to weak, spots $1 lower. Choice 70-105 pounds 40.00-45.00, few new crop lambs 47.00-60.00, Good 60-105 wooled slaughter lambs 35.00-40.00, Utility 60-85 28.00-33.00. Slaughter ewes 12.50-20.50, few to 23.00.

## State Grange Plans Regional Conference

The Pennsylvania State Grange announced plans for a regional conference to be held at 7:30 p.m. Monday, Feb. 25 at the Grange hall in Kutztown.

A. Wayne Readinger, state master, said the meeting has been called to discuss 1974 Grange projects and programs, and problems and legislation involving Pennsylvania agriculture and rural communities.

Attending the session will be masters, lecturers, secretaries and chairmen of women's activities and membership committees of subordinate and pomona Granges, as well as state officers, deputies and committee chairmen.

The region includes the counties of Berks, Bucks, Chester, Delaware, Lancaster, Lebanon, Lehigh, Montgomery, Northampton and Schuylkill.

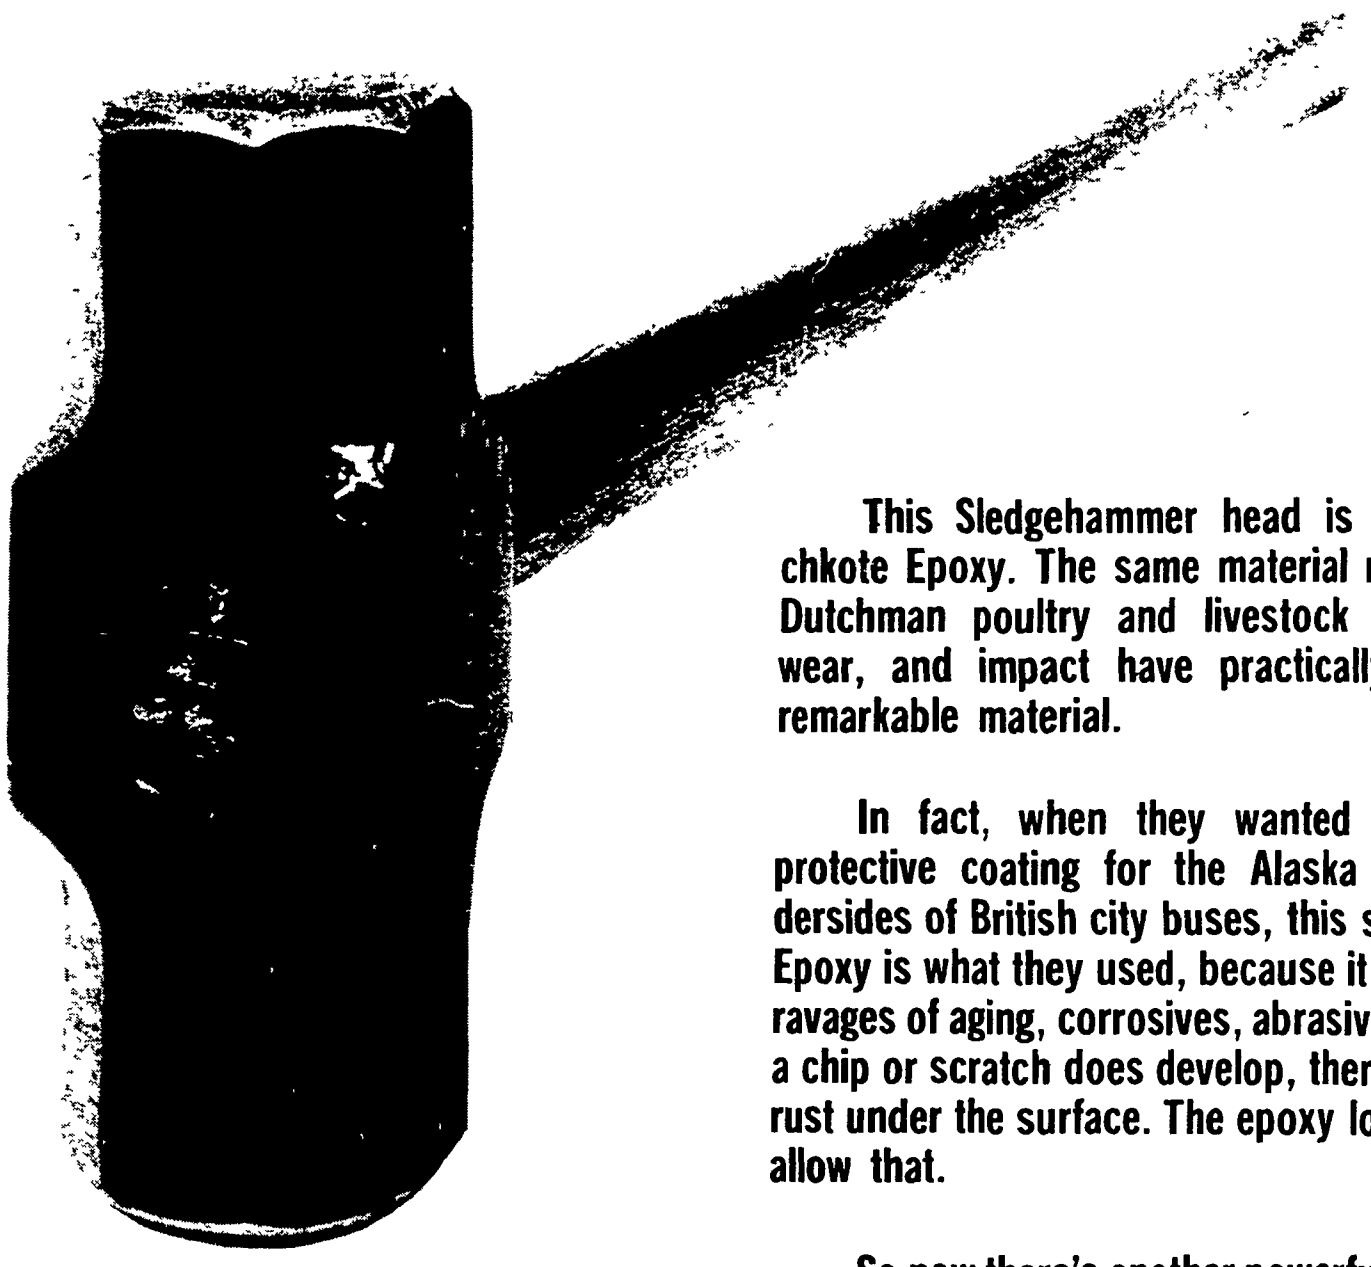
# POUND for POUND, the biggest improvement in poultry equipment



This Sledgehammer head is protected with Scotchkote Epoxy. The same material now used to coat Big Dutchman poultry and livestock equipment. Weather, wear, and impact have practically no effect on this remarkable material.

In fact, when they wanted a really permanent protective coating for the Alaska Pipeline or the undersides of British city buses, this same new Scotchkote Epoxy is what they used, because it stands up under the ravages of aging, corrosives, abrasives and abuse. Even if a chip or scratch does develop, there is no "creeping" of rust under the surface. The epoxy locks on too tightly to allow that.

So now there's another powerful reason for installing Big Dutchman equipment - extra life from new Scotchkote Epoxy. But prove it to yourself. We'll arrange to let you bang away at a convenient rock. We've got the epoxy coated hammer in our office in New Holland, and the super-finish can be inspected on the equipment in our warehouse.

# Hubler Is Top Pa. Corn Grower

The 1973 Funk's-G Project: 200 high yield corn growing champion for Pennsylvania is Robert B. Hubler of Lewisburg. His authenticated yield of 173.8 bushels per acre was made with Funk's G-4444.

Project:200 is America's largest high yield corn growing contest. It was designed to challenge growers to increase corn yields on their land for greater productivity and profit. More than 15,000 U. S. and Canadian growers submitted Project:200 yields during the past three years. The contest is sponsored by the producers of Funk's G-Hybrids.

Hubler's state championship yield of 173.8 bushels per acre was produced on 2.3 acres.

His fertility program consisted of 119 pounds of nitrogen, 77 pounds of phosphate and 38 pounds of potash per acre. This was applied as preplant and starter.

His contest corn was planted on June 2 in 38-inch rows. A herbicide and an insecticide were applied.

Hubler harvested his corn on October 20. Moisture content at harvest was 27.15 percent. As is the case with all Project:200 entries, this was converted to No. 2 corn in calculating the winning yield of 173.8 bushels per acre.

An engraved plaque will be presented to Hubler in recognition of the winning yield.

To qualify for the contest, Project:200 participants agree to harvest as shelled corn, a minimum of two acres from not less than four adjacent rows running the full length of the field. Information on the area harvested, grain weight and moisture content is verified by a disinterested witness. Final yields are reported on the basis of No. 2 corn.

The 1973 national winner is Orville Montri of LaSalle, Michigan. Montri shattered the world record for corn production with a yield of 306.6 bushels per acre from a measured 4.4 acres. His hybrid was Funk's G-4444 The former record of 304 38 bushels per acre was established in 1955 by Lamar Ratliff an FFA member from Prentiss County, Mississippi, using a Gunk's G- Hybrid.

Each Project:200 participant receives special recognition for his entry State winners, such as Hubler, receive engraved plaques. Regional and national champions are presented with engraved silver trophies. As the national winner, Orville Montri received a 1974 pickup truck in recognition of his world record yield

Information gained from the 1973 Project:200 shows a larger number of growers spring plowed their contest corn this year. This was due to unusual weather conditions in the fall of 1972. A majority sidedressed nitrogen and applied phosphate and potash as a starter.

Narrow rows continued to increase in popularity. For example, among the state,regional and national winners, only 11 growers used a spacing of 38 inches or more. The largest number, 15, used 30-inch rows. The remainder preferred between 27 and 36-inch rows.

Far more growers used a herbicide than those reporting insecticide use. Over half of the participants cultivated the contest corn after planting.

The contest is educational as well as rewarding. Information regarding Project:200 entries is computerized by Funk Seeds International, Inc. It is then summarized and made available to corn growers everywhere. With this information, producers can compare their growing methods with those used by other top corn growers.

**Centenarians**

In the United States only three of every 100,000 persons are centenarians.

# Thoughts in Passing

Warren C. Wagner

**The article this week was prepared by Warren Wagner, teacher of agriculture at Lampeter Strasburg High School.**

Many people today still believe that the word "agriculture" means just "farming". The truth of the matter is, though, that they could not be more wrong. It is estimated that of the total United States labor force, 20 to 25 percent of the workers are involved in some form of agriculture occupation including both on-farm and off-farm workers.

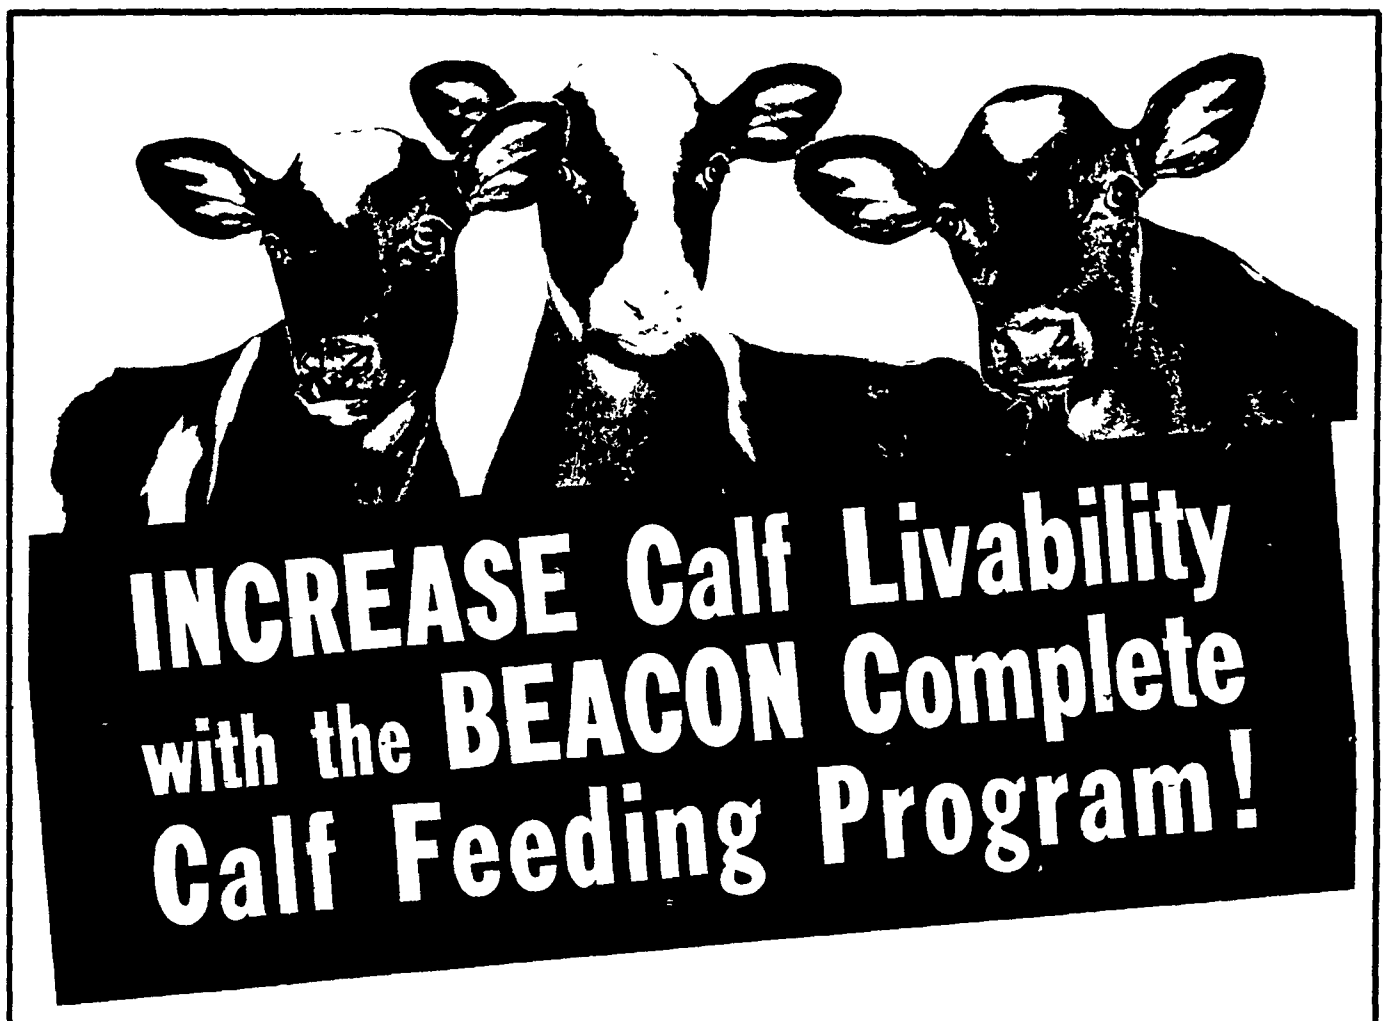
Farming, along with many other occupations, is becoming more specialized. We have more and more farmers just concentrating on one aspect of production, such as the large feedlot operations in the west, or the wheat and corn producers in the mid-west. Because of this more specialized type of farming, farmers have become more dependent upon other people to perform some of the jobs they once did. For example, most farmers do not repair or overhaul their own equipment anymore because it is now too complicated and time consuming. If he wants a job like this done, he has to get an agriculture machinery mechanic to do it and pay for his services.

In instructing students in vocational agriculture, we try to break the agricultural occupations down into eight different categories. They include:

1. **Agriculture Production.** This is the group of people who are actually employed in farming.
2. **Agriculture Supplies.** This group of occupations would work with farm supplies such as fertilizers, sprays, and feeds.
3. **Agriculture Mechanics.** These people would be concerned with the sale and service of agriculture machinery.
4. **Agriculture Products.** This area is concerned with the processing and packing of raw materials from the farm.
5. **Ornamental Horticulture.** This area would cover the employees who work in greenhouses, nurseries and garden centers.
6. **Agriculture Resources.** This would include people who work with conservation and the improvement of natural areas, such as park workers and soil conservationists.
7. **Forestry.** This area deals with the management of trees grown as a crop.
8. **Other Agriculture.** This would include Extension personnel and vocational agriculture instructors.

As you can see, when it really comes to the word "agriculture," there is a lot more to it than just "farming." Without any one of the eight groups, the other seven could not survive. It is a lot like a chain - when one link is broken, the chain is useless until the broken link is repaired or replaced. Each one of the eight categories is dependent upon the other in some way.

We need farming just like we need the other seven agricultural areas. Where would the feedlot owner be without the butcher, or the freight hauler, or the supermarket. He would have a lot of meat on the hoof with nothing to do with it. In this world of agriculture, we need each other, so let's work together to meet the needs of the public as one of America's largest industries.



A recent study by Penn State showed that of 12,000 calves started, more than 18% died in their first 12 months. Beacon's Complete Calf Feeding Program is designed to help you minimize such losses by increasing calf livability.

Be-Co-Nurse milk replacer is one cornerstone of this program. It provides a high level of digestible energy in the form of easily digested lactose (milk sugar) and a high content (20%) of stabilized animal fat.

Beacon Golden Calf Starter is the second foundation stone of the program. It is fortified with vitamins A and D, plus Aureomycin. Partially pelleted, Beacon Golden Calf Starter is a highly palatable grain ration that calves love.

Beacon Calf Power and Beacon Scour Stop-R offer a scour prevention and control program that is highly effective. Calf Power is recommended for calves under undue stress. Scour Stop-R provides a "Feed and Treat" method of combating scours when they actually occur.

Used in your calf rearing program, these Beacon products can help increase your calf livability. Why not call your Beacon Dealer or Beacon Advisor today?

## THE LAST BEATTITUDE

Lesson for February 24, 1974

Lesson for February 24, 1974

Lesson Scripture

Devotional Reading

In the beginning God created the heaven and the earth

The earth was without form and void and darkness was upon the face of the deep And the Spirit of God moved upon the face of the waters

And God said, Let there be light and there was light

And God saw the light, that it was good and God divided the light from the darkness

And God called the light Day and the darkness he called Night And the evening and the morning were the first day

And God said, Let there be a firmament in the midst of the waters and let it divide the waters from the waters

And God made the firmament and divided the waters which were under the firmament from the waters which were above the firmament and it was so

And God called the firmament Heaven And the evening and the morning were the second day

And God said, Let the waters under the heaven be gathered together unto one place and let the dry land appear and it was so

And God called the dry land Earth and the gathering together of the waters called he Seas and God saw that it was good

And God said, Let the earth bring forth grass the herb yielding seed and the fruit tree yielding fruit after his kind whose seed is in itself upon the earth and it was so

And the earth brought forth grass and herb yielding seed after his kind and the tree yielding fruit whose seed was in itself after his kind and God saw that it was good

And the evening and the morning were the third day

And God said, Let there be lights in the firmament of the heaven to divide the day from the night and let them be for signs and for seasons and for days and years

And let them be for lights in the firmament of the heaven to give light upon the earth and it was so

And God made two great lights the greater light to rule the day and the lesser light to rule the night he made the stars also

And God set them in the firmament of the heaven to give light upon the earth

And to rule over the day and over the night and to divide the light from the darkness and God saw that it was good

And the evening and the morning were the fourth day

And God said, Let the waters bring forth abundantly the moving creature that hath life and fowl that may fly above the earth in the open firmament of heaven

And God created great whales and every living creature that moveth which the waters brought forth abundantly after their kind and every winged fowl after his kind and God saw that it was good

And God blessed them saying, Be fruitful and multiply and fill the waters in the seas and let fowl multiply in the earth

And the evening and the morning were the fifth day

And God said, Let the earth bring forth the living creature after his kind cattle and creeping thing and beast of the earth after his kind and it was so

And God made the beast of the earth after his kind and cattle after their kind and everything that creepeth upon the earth after his kind and God saw that it was good

And God said, Let us make man in our image after our likeness and let them have dominion over the fish of the sea and over the fowl of the air and over the cattle and over all the earth and over every creeping thing that creepeth upon the earth

So God created man in his own image in the image of God created he him male and female created he them

And God blessed them and God said unto them, Be fruitful and multiply and replenish the earth and subdue it and have dominion over the fish of the sea and over the fowl of the air and over every living thing that moveth upon the earth

And God said, Behold I have given you every herb bearing seed which is upon the face of all the earth and every tree in the which is the fruit of a tree yielding seed to you it shall be for meat

And to every beast of the earth and to every fowl of the air and to every thing that creepeth upon the earth wherein there is life I have given every green herb for meat and it was so

And God saw every thing that he had made and behold it was very good And the evening and the morning were the sixth day

Thus the heavens and the earth were finished and all the host of them

And on the seventh day God ended his work which he had made and he rested on the seventh day from all his work which he had made

And God blessed the seventh day and sanctified it because that in it he had rested from all his work which God created and made

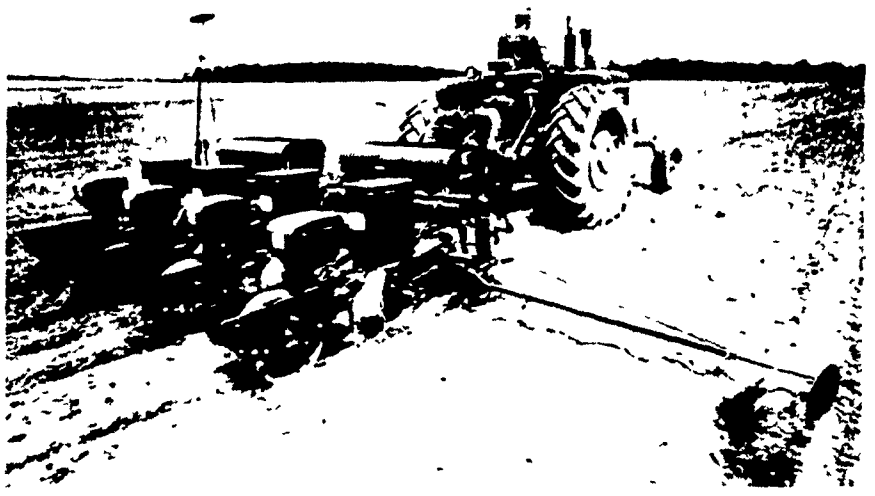
# AGWAY



# HOW TO MAKE THE MOST OF YOUR FERTILIZER SUPPLY

As you prepare for spring; here are three suggestions aimed at helping you stretch your fertilizer supply without sacrificing yield or acres. And you may be sure that Agway is working hard to back up these ideas with the plant foods needed by you and your neighbors.

## 1. Use Agway Corn Starter

It takes just 200 pounds of Agway Corn Starter, through the planter, to help get that planting off to a strong, early start. It is fortified with a fast-working source of starter nitrogen, with over 60 percent of the phosphorus in water soluble form and with key micro-nutrients so critical to early growth. Agway Corn Starter goes to work even under cold, wet planting conditions.

## 2. Assure accurate row application

For vegetables and tobacco, even application of plant food is a must. An Agway complete ammoniated-granulated fertilizer is the ideal way to make sure the job is done right. Today, Agway is the largest supplier of these fertilizers in the Northeast.

## 3. Save time with Agway Nitan

A custom-applied application of Agway Nitan solution may be the best way to make certain your corn gets the nitrogen it needs to build top yields this year. We are scheduling the application rigs right now on a first-call, first-served basis. It can be a time and labor-saver for you.

We're ready to work with you to help make sure that your particular requirements are met.

**Call now so we will know what you need and when you will need it.**

# Rural Development Funding Discussed At Harrisburg Meet

Representatives of seven state agencies Pennsylvania State University and three federal agencies met Tuesday at the Agriculture Building in Harrisburg for a broad-based effort to implement rural development in Pennsylvania

Pennsylvania Agriculture Secretary Jim McHale who chaired the meeting of the Governor's Council on Rural Affairs, said the first job of the state agencies involved is to come up with projects that meet rural development funding criteria of the Farmers Home Administration FHA

McHale said that at the next Governor's Council meeting, which is yet to be scheduled, the agencies will recommend specific projects for funding

Last month Will Erwin, USDA Assistant Secretary for Rural Development, said funds under the federal Rural Development Act of 1972 will be available to local communities to

- Develop community facilities such as sewer, water and transportation,
- Promote development of non-farm businesses in rural areas, providing new job opportunities:
- Provide health, education and other services in rural areas that will result in "people building"
- Develop and improve the environment in rural areas for purposes of recreation and conservation

State FHA Director Penrose Hallowell said his agency would make available to local rural communities in Pennsylvania $31 million in loans and $1 5 million in grants for rural development. This money will be channeled directly from the federal government to local communities The state, through the Governor's Council for Rural Development, will assist local communities in submitting plans for their federal loans

McHale said the Pennsylvania Agriculture Department has initiated a rural transportation project in 23 counties In the past, the Department operated a health demonstration project in six northern tier counties and the Agricultural Community Recovery Effort ACRE), a manpower program that rebuilt farms and rural communities damaged by the floods of Hurricane Agnes

"These projects," said McHale, "can serve as a model for proposals from local communities to secure federal funding." Similar transportation, health and education projects have been undertaken by other state agencies, which also can serve as models.

Agriculture Deputy Secretary Raymond J Kerstetter told the group, "We must develop income producing projects for a sound economic climate The outmigration problem must be solved or we won't have bodies to work with in the future.

To do this," he said, "we must make rural Pennsylvania a better place to live for all of the people" He said present rural industries can be retained and new industries attracted by providing

- Community water and waste disposal systems;
- Adequate safe and sanitary low and moderate income housing
- And recreational enterprises for the entire family

Besides Agriculture other state agencies represented were the Department of Education, the Department of Environmental Resources, the Department of Community Affairs, the Department of Public Welfare, the Office of State Planning and Development and the Department of Labor and Industry

Federal representatives attending were from the Soil Conservation Service the Farmers Home Administration, and the Department of Commerce

## Weaver Promotes J. Beach

John A. Beach, RD1 East Earl, has been named to the position of assistant supervisor in the quality assurance department at Victor F Weaver, Inc., New Holland, Pa.

Beach, a graduate of Lancaster Bible College, joined Weaver in 1971, as a group leader in the prepared foods division. More recently he held the position of night group leader in the quality assurance department

In his new post, he will be responsible for supervising the night sanitation inspection and quality assurance inspection programs.

Dear Livestock Farmer;

Dr. Cloy Knodt tells us that a ton of good quality alfalfa haylage containing 40% moisture and 20% crude protein on a dry matter basis can be an excellent source of protein and considerable economic value. Such haylage contains enough crude protein to equal that of 545 lbs. of 44% protein soybean meal which would cost $54.50 ($200.00 per ton) or $65.40 ($240.00 per ton). Therefore, alfalfa haylage can easily be worth $50 to $65 per ton just for its crude protein value as compared to buying soybean meal.

Sincerely yours,
Bill Wingenroth

# Two-Day Farm Finance Course Set for Lebanon

A two day Farm Financial Management Clinic will be offered by the Lebanon County Agricultural Extension Service on March 5 and 6 at the Municipal Building, Lebanon. The sessions, which will run from 9:30 A.M. to 3:30 P.M. each day, are specially designed for young farm couples or partners in farming. Instructors for the course will be Virgil Crowley, Penn State farm management specialist. One session will feature representatives of local lending institutions. Ralph Horst, Assistant Supervisor of the Lebanon-Berks FHA, Chester Singley, Production Credit Supervisor, and Harold Bucher, Loan Officer of the Peoples National Bank, will explain their agencies farm loan policies.

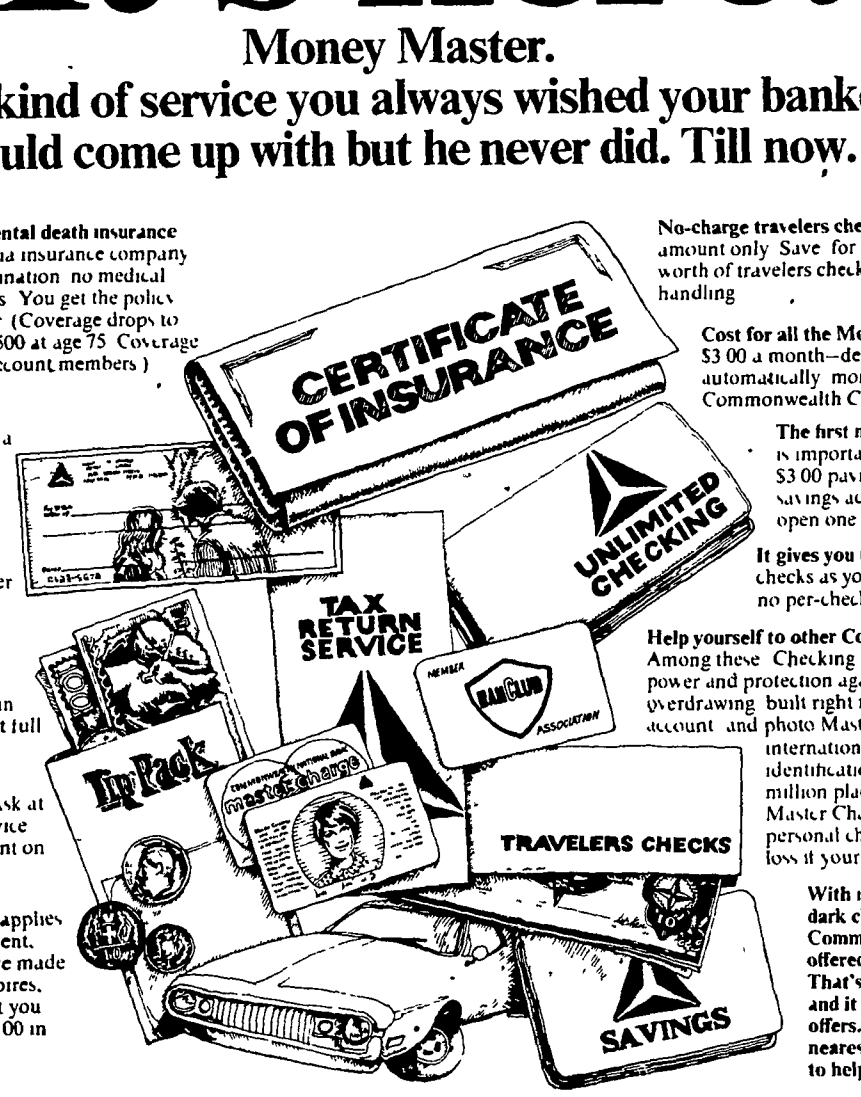
As farm businesses become larger and farmers handle more dollars which result from higher farm prices and the increased use of credit, the success, in fact the very survival of that farm business is often dependent on the financial management of that farm's income. While farmers are receiving more dollars they also are facing more demands for those dollars. Prices of inputs used in production are higher and increased debts means more dollars are required to service that debt.

Farmers interested in these questions and others relating to financial management will want to attend the Financial Management Clinic being held in Room 201, Municipal Building, Lebanon on March 5 and 6. Call the Lebanon Extension Office, 717-273-3748 before March 1 to enroll in the course.

MONEY MASTER

It's here.

Money Master.
The kind of service you always wished your banker would come up with but he never did. Till now.



**It gives you $10,000 accidental death insurance** with a leading Pennsylvania insurance company There is no physical examination no medical history no ifs ands or buts You get the policy if you have Money Master (Coverage drops to $5000 at age 70 and to $2500 at age 75 Coverage divided equally on joint account members )

**Your checks are personalized,** free of charge with your name and address Also choose from a colorful variety of check styles—no extra charge

**You get a Money Master identification card,** good for all these services at any of our offices This card also enrolls you in the Banclub™ Association—you will receive a regular newsletter letting you know about special Club discounts on useful services such as rental cars, bargain vacation tours and the like

**No charge on "Tip Packs"** for your arrival in other lands You get this foreign currency at full face value No bank handling charge

**Reduced rate for tax return preparation.** Ask at any office for the folder on this useful service Money Master members get a 10% discount on regular fees

**5% refund on personal loan interest.** This applies to any installment loan—home improvement, automobile bill consolidation If you have made your payments on time, after the loan expires, we will refund five per cent of the interest you paid For example, if you have paid us $100 in interest, we'll return $5 to *you*

**No-charge travelers checks** You pay face amount only Save for instance $5 on $500 worth of travelers checks No bank charge for handling

**Cost for all the Money Master services:** Just $3 00 a month—deducted painlessly, automatically monthly from your Commonwealth Checking Account

**The first month's on us** Because we think saving is important to you we will deposit your first $3 00 payment to your own Commonwealth savings account (If you don t have one we ll open one for you )

**It gives you unlimited checking.** Write as many checks as you like There's no minimum balance no per-check charge

**Help yourself to other Commonwealth services.** Among these Checking Reserve—borrowing power and protection against accidental overdrawing built right into your checking account and photo Master Charge This international card gives you (a) positive identification—plus charge power—at over one million places of business (b) instant cash at any Master Charge bank (c) guarantee of your personal check and (d) legal protection against loss if your card is misplaced or stolen

**With inflation, the fuel crunch, and other such dark clouds on the economic horizon, Commonwealth thinks it's high time someone offered an old-fashioned bargain in banking That's what Money Master is, pure and simple, and it is a bargain no other bank in this area offers. Use the coupon to join. Or stop in at your nearest Commonwealth office. We'll be happy to help you.**

# Tobacco Shed Fire Probed

Arson is suspected in a $10,000 fire which leveled a Penn Twp. tobacco shed off Sun Hill Road early Saturday.

State Police Fire Marshal Trooper Robert Haycock said the shed contained no heat or electricity. Reasoning that no combustibles were present to start the fire, Haycock suspects arson.

He added Sunday, after viewing the rubble, that possibly someone was in the barn before the fire started and accidentally set the fire with a dropped cigarette.

He said the shed contained two empty tobacco wagons and some corn. He said owner Harold Diffenderfer, Manheim RD1, has insurance for the building.

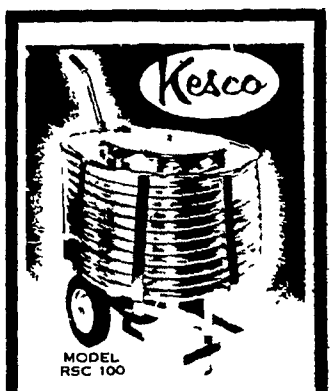
Firemen from eight companies were called from a banquet to battle the blaze. Firemen from Mastersonville, Penryn, Neffsville, East Petersburg, Elstonville, Brunnerville, Manheim and Lititz fought the flames for 45 minutes.

A nearby barn also was damaged slightly, according to firemen. Water had to be pumped through four pumpers, in a line from a pond more than a mile away.

Diffenderfer bought the farm a year ago as a site for future development.

**Laundry Planning**

A laundry area should be planned to include space for collecting and sorting clothes, washing them by hand and machine washing and drying Space for ironing, folding and hanging clothes is useful, too



A MILKMOVER SYSTEM gets you out of the barn sooner-with more money in your pocket! It saves your lugging heavy pails of milk from barn to cooler

- HAS MORE MILK CAPACITY
- PERMITS FASTER MILKING
- ELIMINATES EXTRA HELP
- PROTECTS MILK QUALITY
- IS 100% SELF CLEANING
- HAS ELECTRIC CONTROLS
- FITS INTO ALL BARNS
- EASILY INSTALLED

Available thru your local dairy equipment dealer or call the factory collect to arrange for a free demonstration on your farm.

Chester-Delaware dairymen were honored for having high producing herds this past year at the tenth annual District II Meeting for Atlantic Breeders Cooperative members held February 14 at The Stone Barn, Kennett Square, Pa.

Receiving Certificates of Merit for having top Dairy Herd Improvement Association averages were, left to right, George Lamborn, Vernon Ruth and Earl Weir. Not shown, but receiving an award, was John S. Stoltzfus.

All herds were at least 15 per cent above the state average for butterfat last year, while at least two-thirds of the cows in these herds are progeny of Atlantic sires. The awards were presented by Ed Sauder, Atlantic's Field Supervisor for this area.

Reports by District II Director William Moore of Chathow, Pa., and management representative Harry Roth, Programs Director, informed members that Atlantic completed a successful business year and the net savings has been issued as a patronage dividend.

# PSU Experts Will Discuss Food Outlook

What is the outlook for food prices and food supplies in 1974? Do food and feed shortages really exist, or is there a credibility gap? How do national and international policies and events affect the consumer and the farmer? Are larger stockpiles of surplus grains necessary?

These are some of the concerns that Penn State economists, H. Louis Moore and Harold Neigh, will focus on Tuesday evening March 5, 1974 at the Chester County Cooperative Extension Service Annual Dinner Meeting. The public is invited to attend. Dinner reservations are necessary, and may be made by Monday, February 25, by calling 696-3500.

The event will be held 7:00 P.M. at the Alert Fire Company, 122 Pennsylvania Avenue, Dowxingtown.

**To Loosen A Ring**

To loosen a tight ring, rub soap over the finger above and below the ring. It will slide off when the hand is washed

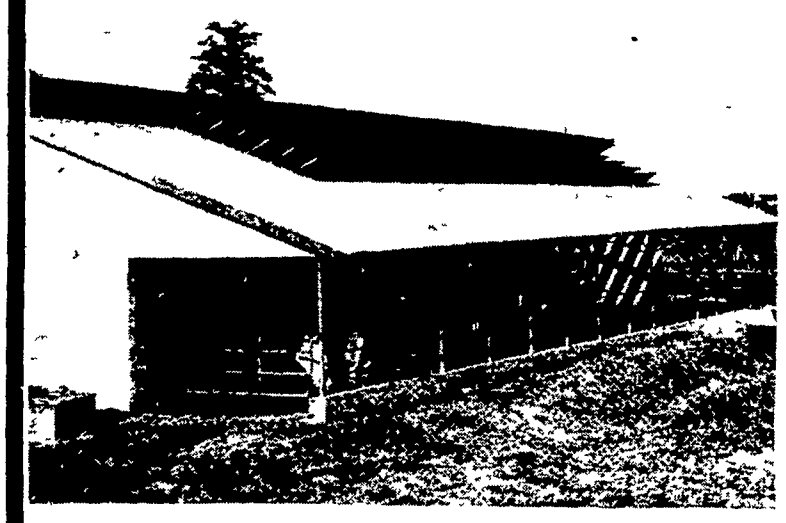
PUT YOURSELF INTO THE FUTURE!

LET THE SUNSHINE IN WITH...

SOLAIR SYSTEMS

SOLAIR COW BAY WITH THE "SUN SENSOR"



FEATURES THE FOLLOWING:

1. Storm-and fire-resistant construction.
2. Rapid evaporation and dehumidification through "solar thermo" circulation.
3. Engineered for expansion.
4. Designed for either beef or dairy cattle.
5. Straight line scrape areas.
6. "Quick dry" floor areas.
7. North side ventilation — summer only.
8. Three sided wall structure — open South.
9. "Jalousie type" Southern roof provides direct sun rays on 80 per cent of floor — OPTIONAL.
10. "Sun Sensor" control automatically opens and closes optional jalousie roof for maximum winter comfort.
11. Complete herd grouping accommodations.
12. Automated feed control.

WE'RE INTERESTED IN ECOLOGY!

With our completely covered lots and a sun roof with an open peak, rain water does not enter the bay area and maximum evaporation of animal liquids is obtained. An "all-drained" floor system is installed and a curbed fence line keeps manure in place to be scraped into a liquid pit or a push-off loading system. By preventing manure run-off the surrounding area is not polluted.

Yes, since your urban neighbors and government fathers are interested in ecology, we are ready to help you build a system that will put you ahead on the pollution problem.

And, low moisture levels in Solair Systems results in less bacteria action and fewer odors.

# ORGANIC LIVING

## By

## Robert Rodale

The bicycle has been different things to different people – a toy for children, an exercise device for fitness enthusiasts, and a means of recreation for fun-lovers. Now the man-powered wheel is earning a new image entirely in this affluent country – a means of basic transportation.

Europeans and Asians have long realized that the bicycle is the most energy-efficient of all means of transportation. Movement of both people and goods by bicycle is important to the economy of many countries on those continents. With the spoked wheel and a few strokes of the legs, almost anyone can cover reasonable distances quickly – and have no gasoline bills to pay.

Americans aren't going to switch away from cars to people-powered transport overnight. But the current energy crunch has had an amazing impact on our attitudes and actions in a very short time, and the move toward cycling for shipping and commuting is bound to increase dramatically. Gasoline rationing will speed that trend even more.

One big problem here is that cars and trucks dominate our roadways to an incredible extent, leaving little room for cyclists. But there are a number of reasons why that situation is changing, creating new opportunities for the growth of cycling.

1. Money for separate bikeways is finally available. In defining the bicycle as a legitimate user of America's roadways, the Federal Highway Act of 1973 appropriated $120 million to be used over the next three years for bikeway construction. Already California and Oregon have earmarked additional state funds to get the project rolling.

A bill calling for the creation of more than 7,000 miles of bicycle trails in the U. S. was introduced in the House recently by Representative Ralph S. Regula of Ohio.

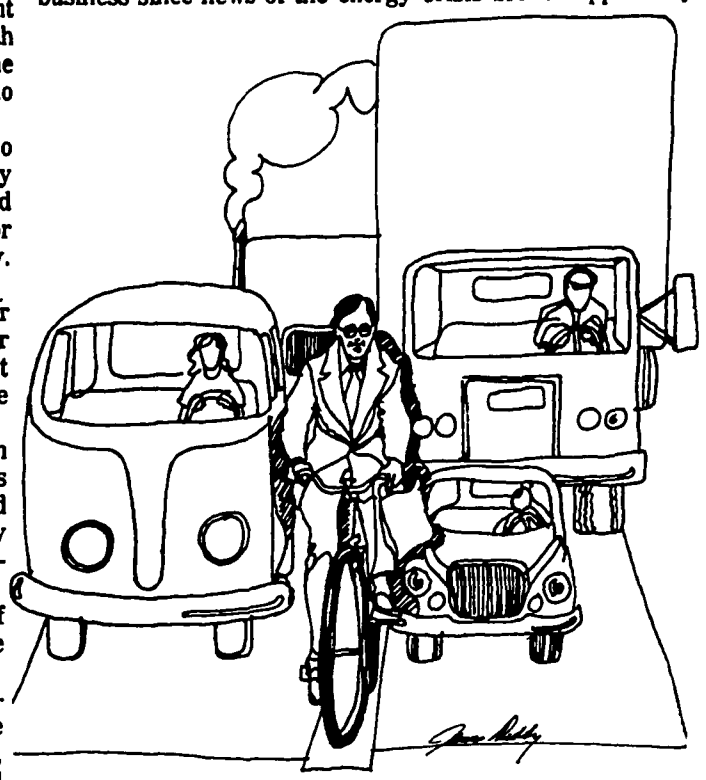
2. The gasoline pinch has forced people to look for alternatives to the family car. Bicycles are suddenly attractive because drivers can leave the car in the garage occasionally, without sacrificing too much mobility. Neighborhood errands, shopping, and – in some cases – even commuting to work can be handled conveniently with a bicycle, provided distances aren't too great.

3. Bicycles fit into individual aspirations for a simpler lifestyle. Unlike an automobile, a bike can be maintained and repaired by its owner with very little trouble or training. There are a number of good books on the market that explain everything you need to know about maintaining your bike – from adjusting the brakes to replacing a tire.

Costs aren't astronomical either. There's no comparison with the kind of financial headaches associated with owning an automobile. You can buy a quality 10-speed touring bicycle for less than the cost of routine repairs on a "luxury" car. And even major replacement items like tires and brakes are surprisingly inexpensive.

Bicycles aren't designed to be traded in every other year. There's little depreciation because styles don't change. The emphasis is on function and efficiency.

Bike sales have skyrocketed for a few years and there are signs that production is catching up with demand. But bicycle repair shops report a tremendous upswing in business since news of the energy crisis broke. Apparently many people are finding long neglected bikes in basements and garages and having them reconditioned.



As the number of cyclists increases in coming months, here are some developments we may expect:

- Bikeways will be positioned near many major roadways. New highways will be constructed with special bike lanes as integral features.
- Look for multiple-use bikeways, particularly in northern states where harsh winters make year-round cycling difficult. Maine is considering a proposal that would utilize summer bikeways as winter avenues for cross-country skiers. Abandoned railroad beds and powerline right-of-ways are prime candidates for such multiple-use schemes.
- Bike racks will blossom near office buildings and shopping centers. Row on row of parked bikes are already a common sight at universities, especially in the West. But rack makers, in their trade journal ads, are now pushing for all sorts of municipal and corporate placements.
- Schools will start stressing bicycle safety education. We may even see driver education courses expanded to include such material.

If you're drving less on weekends, why not invest some leisure time in gardening this year? "Help is on the Way" is an information-packed booklet that answers 66 of the most-asked questions about raising vegetables organically. It's available for fifty cents from Robert Rodale, Organic Living, in care of this newspaper. Be sure to ask for the booklet by name and allow about four weeks for delivery.

# Easter Seal Society '74 Goal is $67,000

The Easter Seal Society for Crippled Children and Adults of Lancaster County has announced that its 1974 fund raising campaign will be held Friday, March 1, through Easter Sunday, April 14. The society hopes to raise $67,000 during the campaign to continue its rehabilitation work with Lancaster County's handicapped children and adults.

No door-to-door soliciting is conducted during the Easter Seal drive. As in past campaigns, this year's drive will rely on mailed-in contributions backed by returns from Buck-A-Cup Coffee Day, which is sponsored annually by the Lancaster County Restaurant Association.

Named to head this year's campaign are Philip L. Rife, RD2, Lititz, and Maurice M. R. Thomas, 790 Stony Battery Road, Landisville. Rife is an employee communications superivsor for Armstrong Cork Company, and Thomas is a manager in Armstrong's training and development section.

Other members of the 1974 campaign committee announced are : Thomas S. Werlinich and David M. Hetu, advertising; Robert R. Black and Elaine Terranova, art; Larry W. Sipe, Buck-A-Cup; A. J. Pryzbylkowski, production; Richard B. Sinclair, publicity; and Eric Berman, radio and television.

Last year the Easter Seal Rehabilitation Center treated more than 2,000 Lancaster County children and adults. This year's campaign proceeds will go to support a wide range of Easter Seal programs including physical, speech and occupational therapy, amputee services, an orthopedic clinic, a rehabilitation clinic, a cerebral palsy clinic, electrodiagnostic services, a preschool developmental program, a horsemanship program for handicapped children, a swimming program; a summer camp, boys' and girls' scouting groups, a comprehensive informat on and volunteer service program, an equipment loan service, and art, group and craft therapy for adults.

Nine Southern Lancaster area dairymen were honored for having high producing herds this past year at the tenth annual District V Meeting for Atlantic Breeders Cooperative members held February 19 at Quarryville United Methodist Church.

Receiving Certificates of Merit for having top Dairy Herd Improvement Association averages were, left to right, Roy Book, Aaron E. Beiler, J. Mowrey Frey Jr., Ken Rutt, Vernon Umble, Paul Nissley, and Parke Ranck. Receiving an award, but not shown, were Robert Ulrich and Curtis Akers.

All herds were at least 15 per cent above the state average for butterfat last year, while at least two-thirds of the cows in these herds are progeny of Atlantic sires. The awards were presented by Ed Sauder, Atlantic's Field Supervisor for this area.

## Garden Spot (Continued From Page 1)

shey was fourth with 11,256 pounds.

The top corn grain award went to Eugene S. Eberly, New Holland RD2, for his 156.2 bushel yield. Earl S. Weaver, New Holland RD1, was second with 147.5 bushels, John Landis, Creek Hill Rd., Lancaster was third with 140.0, and Walter C. Martin was fourth with 139.1 bushels per acre.

Weaver and Eberly also realized the highest net return per acre for their winning entries.

William Fisher was given the past president's award during the meeting. A certificate of appreciation went to John Campbell, a past president of the association and past public relations director of the Pennsylvania Young Farmers. Campbell reported that he was packing up and moving to Missouri, where he has bought 886 acres some 55 miles north of Kansas City. Another certificate of appreciation went to Dick Wanner, editor of Lancaster Farming.

Guest speaker for the evening was Boyd Gartley, director of member relations for Inter-State Milk Producers Cooperative. Gartley's speech was entitled "The Love of Power vs. The Power of Love".

# Feed Industry Conference to be Held in Harrisburg

Program details for the Pennsylvania State University Feed Industries Conference to be held March 20 at the Host Motor Inn, Harrisburg were announced recently by the Conference Chairman, Dr. Theodore Long, Professor of Animal Science at the University.

"In view of the existing shortages in such critical animal feed ingredients as nitrogen and phosphours, it is our purpose to analyze the cause and effect of those shortages in the ration — together with some ideas on substitution," Long said.

To make the Conference more appealing, the committee planning the event moved it from the University campus to a more accessible location and deliberately worked to achieve a balance in program participants from both industry and the academic world. Following a 9:00 A.M. registration, the program will consist of:

Welcome - Ned L. Clark, Shamokin, president, PennAg Industries Association; "Economic Effects of Exports on Marketing" - Prof. H. Louis Moore, Penn State University; "Current University Recommendations in Dairy Cattle Feeding" - Dr. Donald Ace, Extension Dairy Specialist, Penn State University; "Utilization of Non-protein Nitrogen in the Ration" - Dr. William Chalupa, West Chester, Smith, Kline and French Laboratories.

"Anhydrous Ammonia as a Source of Feed Nitrogen" - Dr. William Kjelgaard, Ag Engineer, Penn State University; "The Effect of Ingredient Substitution or Deletion on Animal Performance" - A panel discussion chaired by Robert Grobengeiser, Lancaster, Getkin Associates; featuring Dr. John Lisner, Chicago, International Minerals Co.; Dr. Richard Peacock, Lancaster, Pennfield Corporation; Gerald Hess, Roaring Spring, Young's, Inc.; Dr. J. L. Gobble, Penn State University; "Regulatory Procedures, Rules and Enforcement" - Nick L. Turko, Harrisburg, Feed Fertilizer Division, Pa. Department of Agriculture; "Animal Helth Research" - Dr. Gerald Jung, USDA Agronomist, Penn State University; A. F. Kish, Elizabethtown College.

The Conference was planned by a committee composed of members from the University and PennAg Industries Association. The Conference is open to all who have an interest and information and reservations may be obtained by contacting Dr. William Sipple, Jr., 410 Keller Bldg., University Park, Penn. 16802.

### Barbecued Beef For Many

A menu built around barbecued beef on buns is a popular choice for chairmen planning church suppers and scout functions Thrifty pot-roast is an ideal choice for "barbecuing" and serving sandwich-style to a crowd The meat can be braised to juicy tenderness in a tightly covered pan early in the day or the day before Then it may be sliced thinly and reheated in a tangy barbecue sauce for service on crusty rolls The spicy meat in sauce may also be spooned over fluffy rice or buttered noodles

### New World Of Menu Planning

There's a whole new world of menu planning when you turn to sausages The more than 200 varieties of these exciting spicy meat products available today provide many possibilities for making menus interesting with new casserole, salad and sandwich combinations

# USDA Sets Type 41 Tobacco Referendum

Secretary of Agriculture Earl L. Butz has proclaimed marketing quotas for the 1974, 1975 and 1976 crops of Pennsylvania cigar-filler (Type 41) tobacco and called a grower referendum for February 25-March 1.

In the referendum, growers will decide by their votes whether marketing quotas will be in effect on the next three crops. Quotas have never been in effect for cigar-filler tobacco. Legislation provides that the Secretary of Agriculture shall proclaim marketing quotas during the last year of a three-year period for which growers of any kind of tobacco have disapproved marketing quotas. Quotas were proclaimed on the 1971, 1972 and 1973 crops of Pennsylvania cigar-filler tobacco and were disapproved by growers voting in a referendum held in February 1971.

The National acreage allotment for the 1974 crop of cigar-filler tobacco was announced as 46,651 acres. There were 14,000 acres of cigar-filler tobacco grown in 1973.

Notices showing the 1974 allotments for individual farms are being mailed to farm operators by local ASC Committees. Local Committees will mail to all known producers of cigar-filler tobacco ballots to be used in voting in the referendum. Any producer who does not receive a ballot may obtain one from the office of the locas ASC Committee.

# Octorara Young Farmers Plan Annual Banquet

The Octorara Chapter of the Pa. Young Farmers have been holding very interesting farm meetings in the ag room of the Otorara High School this winter

On February 25, a Diesel and Gasoline Engine Maintenance and Tune Up meeting will be held in the shop of C. B. Hoober and Son, Intercourse, Pa. Farmers interested in attending this meeting are to be at the C. B. Hoober shop at 7:30 p.m.

On March 4, the Octorara Young Farmers plan to hold their Fifth Annual Banquet in the cafeteria of Octorara High School, with the Burkhart Family from Lancaster providing the entertainment.

There will be awards given to the winners of the various contests held during the 1973 season.

Tickets for the banquet may be purchased from Glen Engle, 593-6097; Elmer Mast, 593-5853; or Ivan Stauffer, agricultural teacher at Octorara High School.

**Meat Dollar Spending**

Who spends the most meat dollars? Those families whose head is between the ages of 35 - 44, with the over 55 age group second. Youngest purchasers, whose household head was under 25 years of age, spent only 5 percent of the meat dollar

Paul J. Boyer, President of Lancaster Ford Tractor, Inc., Lancaster, Pa. receives a 1974 Service Excellence plaque from Harold Bedsaul of Ford Tractor's Eastern District Office in Richmond, Virginia. The plaque, presented under Ford Tractor's new Dealership Service Excellence Program, recognizes standards of excellence required to provide superior customer service.

Ford Tractor dealerships who qualify for the award must rate top marks for conforming with local service-shop safety regulations, completion of service - technician training through factory-sponsored courses, approved accounting records and control systems, qualified service management, meeting of product service requirements, and sufficient capacity to properly handle product line and volume of service.

# Three Promoted By Poultry Firm

Three personnel changes have been announced in the maintenance division of Victor F. Weaver, Inc., New Holland, according to Paul M. Martin, manager of manufacturing services.

William L. Koch, RD2 Ephrata, has been appointed to the position of assistant maintenance superintendent, responsible for coordinating the plant maintenance activities as well as maintenance scheduling and parts inventories. Since joining Weaver in 1968, he has held positions as a night mechanic and maintenance foreman, and more recently as plant maintenance supervisor.

Lewis B. Groff, Blue Ball, has been named to the newly created position of utilities and projects foreman. Since joining the company in 1961, he has held positions in production and mechanical maintenance. Under the new responsibilities he will be responsible for the supervision of construction and installation projects and plant maintenance systems.

Frank Kirkpatrick, 1390 West Main St., Ephrata, has been promoted to the position of plant maintenance foreman responsible for supervising the installation and maintenance of all company production systems and equipment. He has served as a production mechanic, and more recently as a group leader in the maintenance department.

**License Plate**

I just saw a very unusual license plate: "HUP 234." I found out the guy who drives the car is an Army drill sergeant.

# Conservancy Acquires First Tract of Land

The Lancaster County Conservancy got its first land last Friday, a two-acre gift from a Millersville RD1 landscape architect.

Mr. and Mrs. Warren H. Boyer gave the deed to the conservancy for the property where the Little Conestoga Creek babbles under Walnut Hill Road.

The Conservancy is permitted by law to acquire land and set it aside for open space and preservation purposes.

Although the organization has its sights set on buying Chickies Rock, along the Susquehanna River, it has made no purchases yet. The gift from the Boyers represents the Conservancy's first land acquisition.

"This two acres," Mrs. Boyer said Friday night, "would never have been any use to anyone. You could never put a building on it. But it is very picturesque, and people might as well enjoy it."

She explained that her husband has been active with the Conservancy and the Conestoga Valley Association, another conservation-minded organization.

"This is the first land the Conservancy has acquired,' said Robert K. Mowrer, president of the Conservancy, "and we will take the necessary legal steps to preserve it in its natural or semi-private state."

He said it would be available for the public "to see, walk through and enjoy for generations to come."

"There are many other areas in Lancaster County which should be preserved in a like manner," Mowrer continued, "and we hope that this example set by Mr. and Mrs. Boyer will encourage others to do likewise."

The Conservancy is continuing its goal of raising the $34,000 necessary to purchase 113 acres on Chickies Hill, all money coming from private donations and membership fees.

The public is invited to the Conservancy's annual meeting Tuesday, Feb. 26, at 7:45 p.m. in the Commonwealth National Bank building, 1415 Lititz Pike.

The Chickies project will be discussed at that time. Also the featured speaker will be Robert W. Peirson, executive director of the Bucks County Park Foundation.

Dear Livestock Farmer;

Dr. Cloy Knodt tells us that a ton of good quality alfalfa haylage containing 40% moisture and 20% crude protein on a dry matter basis can be an excellent source of protein and considerable economic value. Such haylage contains enough crude protein to equal that of 545 lbs. of 44% protein soybean meal which would cost $54.50 ($200.00 per ton) or $65.40 ($240.00 per ton). Therefore, alfalfa haylage can easily be worth $50 to $65 per ton just for its crude protein value as compared to buying soybean meal.

Sincerely yours,
Bob McSparran

# FARM TRENDS

(Continued From Page 1)

fertilizer supplies."

For the U.S. to meet the domestic demand for crops this year and also to honor its export contracts, the institute says, nitrogen-fertilizer production would have to increase by 16 percent — which is impossible, because there aren't the factories to do this and imported fertilizer is also in short supply.

The actual increase in U.S. nitrogen-fertilizer production this year will be between 3 percent and 4 percent, says the Agriculture Department's Mr. Paarlberg. This is being achieved by "cranking up old plants" — in some cases with only limited supplies of natural gas — running other plants at full capacity "around the clock" and cutting back on fertilizer exports. This extra fertilizer will give the U.S. total stocks of 27 million tons of feed grain by October, Mr. Paarlberg estimates, "which will be enough for our needs."

Mr. Paarlberg attacks the "doleful cries" of farmers and fertilizer producers and says that the claimed shortages are only shortages "of what farmers would like to buy," rather than shortages of what they really need. Crop prices now are so high, he says, "that farmers want to maximize their yields; they want to sock the nitrogen fertilizer on." It is true that as the price of grain rises, a farmer tends to use more nitrogen fertilizer to increase his yields.

But why, asks Donald N. Collins of the Fertilizer Institute, is the Agriculture Department allowing some 20 million new acres of wheat, corn and cotton land to go into production this year "if they don't want farmers to get the maximum possible yields?" He adds, "The Agriculture Department has thrown the farm industry into a tizzy with their planning. Now they're a moving target."

Mr. Paarlberg replies that the fertilizer industry is attempting to "diminish the estimate of supply" in order to increase the price for its product. Already the price for ammonia, a common nitrogen fertilizer, is as high as $120 a ton, up from $60 a ton last October when the Cost of Living Council lifted price controls on fertilizer.

Prices are also rising for phosphate and potash fertilizer, which are used to increase the quality of crops. But it is the nitrogen fertilizer that is essential to producing grain-laden wheat and corn plants.

# Musser Places First in Corn Yield Contest

Mervin L. Musser, Shippensburg, Franklin County, won first place in the state of Pennsylvania in the Non-Irrigated Division in the National Corn Yield Contest, conducted by the National Corn Growers Association, with a yield of 184.88 bushels per acre, the association announced.

Second place in Pennsylvania in the Non-Irrigated Division went to Gerald L. Shoop, Milton, Northumberland County, with a yield of 175.82 bushels per acre.

Melvin L. Shertzer, Millersville, Lancaster County, placed third in the Non-Irrigated Division with a yield of 170.08 bushels per acre.

Over 1386 entrants from 43 states ranging from coast to coast competed for the coveted top three national trophies awarded in both the Irrigated Division and the Non-Irrigated Division and the all expense paid European trips the national winners and their wives will receive from Shell Chemical Company's Agricultural Division, producer of Bladex corn herbicide. The contest field had to be at least 25 acres in size. The 1973 National Irrigated Contest had 11 entries with yields over 200 bushels per acre and seven over 200 in the Non-Irrigated Division.

National and state winners will receive trophies and awards at the association's annual meeting in Des Moines, Iowa, at the Fort Des Moines Hotel, March 28 and 29.

Sweet Bulky Great in Brood Sow Rations, Too!

Sweet Bulky . . . dairymen have been using it in their milking rations for a long time. The reason? It makes feed taste better, work harder, more digestible and more palatable. Well, sir, Sweet Bulky works equally great in brood sow rations, too. When used around farrowing time, it really comes through. Great for eliminating constipation. Sweet Bulky contains minerals, vitamins, beet pulp, dehydrated alfalfa meal and molasses. Those ingredients tell a story all their own. Wayne Sweet Bulky for hogs . . . try it.

Federal law and regulation prohibit the payment of a time deposit prior to maturity unless three months of the interest thereon is forfeited and interest on the amount withdrawn is reduced to the passbook rate.

Tom Zartman, right, was honored for his hay-growing achievements during the past year by Arnold Lueck, assistant county agent, during the annual Crops and Soils Day on Tuesday.

# Double-Crop Beans

(Continued From Page 1)

and using as late a variety as possible. After June 10, he pointed out, farmers lose one bushel per acre yield for every day of delay. Some Maryland farmers are even going to earlier grain varieties so they can get their soybeans planted in plenty of time.

Narrow rows, no wider than 30-inches and preferably 15-inches, are needed for double-cropped beans, Yocum said. "If you plant in 36- or 40-inch rows you're going to be taking a serious gamble, because you may not get beyond your break even production point."

William Poorbaugh, president of Lancaster's Poorbaugh Grain Co., was also a speaker on the Crops and Soils program. Poorbaugh told the group, "If we hadn't stopped exporting soybeans last year, we'd have run out."

This year, in Poorbaugh's opinion, soybean prices will probably stay more in line with rises in corn prices, because there should be enough beans to handle domestic and export needs.

He advised local growers to not switch from corn to soybeans. "I'm not against growing beans, and you should learn to do it. But is this the year to bet your bundle on beans? I don't think so." I'm bullish on corn this this year, and I think we're going to see a very strong corn market. I wouldn't stop growing corn to start growing soybeans, but beans may have a place somewhere in your operation."

Wheat, according to the local broker, is in the condition this year that beans were in last year. Short supplies are exerting considerable pressure on prices, and the market will probably see new highs in the coming year. "I think we'll get into the new crop, though, without seeing bread at $1 a loaf," Poorbaugh noted. "Even now there's only six cents worth of wheat in a loaf of bread, and at that rate, wheat would have to sell for $40 a bushel to justify $1 a loaf."

William Poorbaugh discussed soybean marketing at the Crops and Soils Day on Tuesday.

Other speakers at the 14th Annual Crops and Soils Day were Arnold G. Lueck, assistant county agent, Professor Burt S. Horne, Penn State extension agricultural engineer, Dr. John A. Baylor, Penn State extension agronomist, Dr. Joe H. McGahen, Penn State extension agronimist, and Dr. Willis L. McClellan, Penn State extension agronomist.

Burt Horne surprised the group when he told them that no-till farming methods were going to become more and more important, and the one thing that would keep no-till important was the moldboard plow. "As time goes on," Horne explained, "no-till fields will be covered with more and more surface debris. Insect and disease problems will increase, especially as no-till is adopted by farmers who don't do quite as well as they should at keeping their weed and bug problems under control."

Horne said he recommends moldboard plowing about once every four to five years to completely invert the soil.

Corn is the principal crop planted with no-till methods today, Horne reported, but the university is working on other crops, as well. Soybeans are being studied, and some vegetable crops like potatoes and cabbages are being looked at, too.

Dr. John Baylor, a nationally recognized forage expert, told the group that alfalfa was as valuable a crop as corn silage, and one of the best protein sources available to farmers.

Joe McGahen talked about corn diseases and new corn varieties, and Dr. Willis McClellan went over some of the basics of weed control and the reasons why some control programs fail.

John Yocum, director of Penn State's Southeast Research Center at Landisville, was one of the speakers at the annual Crops and Soils Days held Tuesday at the Farm and Home Center.

How you can get a dozen more eggs per hen for less than 3¢

The AUREOMYCIN® chlortetracycline Week-A-Month Layer Program

The economic advantages of feeding AUREOMYCIN to commercial layers have been well documented.

Now, with today's cost of feed and the price of eggs, new interest has been shown for this accepted and profitable practice.

Whether you sell eggs for 40 ot 60 cents a dozen, this Cyanamid program can increase your income . . . substantially.

The Week-A-Month Layer Program involves feeding 100 grams of AUREOMYCIN chlortetracycline per ton for one week at housing and for one week each month for as long as birds are in production.

Field trials show that for an investment of less than 3 cents in AUREOMYCIN per layer you can expect an extra dozen eggs per bird, or an extra return of $400-600 per 1,000 birds — with eggs at 40-60 cents per dozen.

The Week-A-Month feeding program with AUREOMYCIN is equally effective for broiler breeders.

Trial results show that an investment of less than 3 cents in AUREOMYCIN per breeding hen can produce 6 extra chicks per bird, or a total of approximately $450 extra return from every 1,000 breeders a year — figuring the cost of chicks at 7.5 cents.

Whether you're producing table eggs or broiler chicks, for extra profit put your next flock on the Week-A-Month Layer Program with AUREOMYCIN.

Some 1150 buyers from 24 states and Canada converged on a farm equipment auction held recently at Wenger's Farm Machinery in Myerstown. Shown here are part of the crowd which watched 140 used tractors, 20 new tractors and 1000 pieces of other farm machinery go under the auctioneer's gavel.

# Farm Fuel Supply Improves But Fertilizer Still Tight

The farm fuel situation has improved slightly over late January due to availability of allocations for the new month, according to Nicholas H, Smith, Director of the U. S. Department of Agriculture's Energy Office.

Smith also reported that the new mandatory allocation regulations have not been received by all suppliers yet. Some are still delivering fuel to farmers based upon a reduced fraction of the 1972 base. This is causing inconvenience and an unnecessarily tight situation in some rural areas where farmers are trying to supplement their needs with purchases directly from service stations.

According to Smith, the liquified petroleum gas situation has improved over late January with only five states reporting problems as of Feb. 7.

Fertilizer supplies, in part tied to the availability of fuels, are unavailable at retail in many states as of Feb. 7, according to reports from county Agricultural Stabilization and Conservation Service offices across the nation.

Smith said that another factor in the shortages is that farmer-purchases of fertilizer are up substantially, 35 percent above a year earlier in the July through November period.

# Equipment Auction Draws 1150 Buyers

On January 28th and 29th one of the largest farm machinery auctions was held at Wenger's Farm Machinery at Myerstown in Lebanon County.

Sold were 140 late-model tractors, 20 new tractors, approximately 1,000 pieces of farm machinery, and a large selection of trucks and construction equipment.

The Myerstown Brethren Church was as happy as the Wenger's, as they sold $3,370 worth of food.

There were 1,150 registered buyers from 24 states and Canada. Quite a few states were represented from the West and Midwest. The buyer that purchased the most farm tractors was a dealer from Texas.

The highest priced tractor sold was a new Case Model 2170, sold to an Indiana dealer for $22,700.

There were quite a few farmers that went home with tractors to use on individual farms. A farmer from Indiana bought a new Oliver 1855, while a farmer from Denver, Colo., purchased a late model used tractor.

The Midwest Auction Co. of Grand Meadows, Minn. managed the auction with Con Clement as manager. Auctioneers were R. T. McWhirter of Baxter, Iowa, John Godley of Charlotte, N. C., Bruce Sampson of Piqua, Ohio, and Blaine Rentzel of York, Pa.

The Wenger's are planning consignment auctions for this Spring. April 1 farm tractors will be sold, April 2, farm machinery, and April 27, construction equipment.

Carl I. Wenger, Pres. and Lloyd J. Wenger, V. Pres. and sales manager of Wenger's Farm Machinery would also like to thank local farmers, dealers and contractors who helped to make this such a huge success.

# Willow Maple Herd Cited

Milk and butterfat production levels established by Registered Holstein cows in this area have been reported by Holstein-Friesian Association of America. All cows are from the herd of Willow Maple Farm, Newmanstown RD1, enrolled in the DHIR official testing program.

Cows recognized for their exceptional food producing ability are:

Willow Maple Flying Brenda, age 5-11, 22,180 pounds milk, 841 pounds fat, 3.8 percent test in 305 days milked.

Jon-Betz Blk Magic Edna, 4-10, 19,330 milk, 770 fat, 4.0 percent test in 305 days.

C Raylane Leader Dianne, 5-2, 19,130 milk, 725 fat, 3.8 percent test in 279 days.

Willow Maple Expec Star Lu, 6-9, 18,700 milk, 710 fat, 3.8 percent test in 360 days.

Willow Maple Tidy Jean, 4-1, 16,650 milk, 710 fat, 4.3 percent test in 288 days.

Willow Maple Expec Lu, 6-10, 13,620 milk, 710 fat, 5.2 percent test in 356 days.

Ferndale G Boy Winnie, 3-8, 16,080 milk, 606 fat, 3.8 percent test in 305 days.

Willow Maple Expec Irene, 6-10, 14,060 milk, 605 fat, 4.3 percent test in 292 days.

C Hurstvale Lucy, 5-3, 15,940 milk, 570 fat, 3.6 percent test in 292 days.

# Princep keeps panicum and crabgrass out of your corn.

# Up to harvest.

Even in a wet year.

That's one reason why Princep® teams up so naturally with AAtrex®.

Of course, there are other herbicides you can use with your AAtrex. But Princep assures you control of fall panicum and crabgrass. Right up to harvest.

Essential if you expect to grow good, clean corn. This year or any year.

Princep also teams up with AAtrex to stop most annual grasses and tough broadleafs. Up to harvest.

Another thing. Mix Princep in with your AAtrex, and you can spray when you find the time. Earlier than any other herbicide combination. Before planting, at planting or afterwards. But before weeds and corn come up. In a weed 'n feed program if you choose.

You won't have problems rotating to soybeans, either. Just follow the label.

Here's something else about Princep that'll interest you. Now it comes in liquid form. New Princep 4L.

Making it a perfect match for AAtrex 4L. Easy to measure. Easy to mix.

If you have any questions, please let us know. Agricultural Division, CIBA-GEIGY Corporation, P.O. Box 11422, Greensboro, N.C. 27409.

*Willow Street Vo-Tech . . .*

# The Place To Learn Gourmet Cooking

by Sally Bair
Feature Writer

The kitchens of the quantity foods class at the Lancaster County Area Vo-Tech School at Willow Street are a beehive of activity. At any given moment there may be bread rising, cakes baking, perfectly arranged chef's salads being prepared and soup bubbling on the stove.

All the work is being done by the 67 students from county schools who are preparing themselves for careers in the food industry, under the supervision of teachers Wayne Byers and Jay Eshleman.

The quantity foods class includes instruction in bakery and restaurant practices and students learn the gamut from arranging attractive platters to baking danish pastry.

Wayne Byers has responsibility for teaching the bakery

Learning to work in the food industry offers lots of opportunity for creativity. Here Mr. Eshleman helps his students as they prepare to coil up a snake made from "dummy dough".

portion of the course. Although raised in the Pennsylvania Dutch country of Lebanon County he owned a bakery in Columbia and two years ago built "Byers Pastries" in Marietta, which is now being operated by a son. The bakery tradition runs in the Byers family with two other sons owning bakeries in Elizabethtown and Hanover.

Byers said his interest in teaching stems from having owned his own bakeries. "I had a desire to teach young people because I had trained so many people in my shop."

From all the delicious-looking doughnuts, cookies and cakes to be found in the bakery department, it appears that his training is quite successful.

The course outline indicates that students leaving the class should be well prepared to delight a wide variety of tastes. Students learn to make biscuits, muffins, quick breads, yeast breads of all varieties, danish pastry, doughnuts, cookies of more types than I knew existed, cakes, icing and fillings, pies, puff pastries, petit fors and a wide variety of other mouth-watering foods. It's small wonder that the classroom smells are the most inviting anywhere.

Having half day sessions is not without its difficulties when it comes to baking. Byers says the morning class must prepare yeast doughs which are then completed by the afternoon class. A huge refrigerator and freezer helps to hold foods for further work on subsequent days.

Byers says there is no particular effort to teach the students to prepare Pennsylvania Dutch specialities, but adds, "We do prepare them to be employed locally."

Although most of the recipes used in the class are standard, Byers said students occasionally bring in their own recipes and they will be discussed and tried if possible.

What happens to the delicious things that come out of the gigantic ovens in the bakery department, and to the failures? All the students at the Vo-Tech school help to eat them! Each day different classes are allowed to purchase the goodies at a nominal price. There was no mention of the students there suffering from unusual weight problems.

Overseeing the restaurant practice operation is Jay Eshleman, a graduate of Ephrata High School and the Culinary Institute of America at Hyde Park, N. Y., where he had two years training as a chef. He had quite a lot of on-the-job training all along the eastern coast, and he says he has worked in diners, hotels, hospitals, seafood houses and just about every kind of food service operation. For four years he was one of the chefs at Lancaster General Hospital, and this is his third year at Willow Street.

Eshleman speaks enthusiastically about the training that is offered at the Vo-Tech school. He says, "The three main areas we stress are shop safety, sanitation and developing good work habits and attitudes. Most people do not leave jobs because they can't do the work, but because they can't get along with other people. This is something we try to emphasize."

Eshleman added, "The primary goal of the course is to prepare each student for some kind of work in the food industry." This may mean he will be a chef, or he may be a pot scrubber, but the important thing is that each student will be qualified for a job which will make him an independent wage earner.

Students in the two classes do not learn just to prepare the food, but they also spend a great deal of time learning procedures and basic cooking methods and techniques as well as sound nutrition.

Eshleman points out that there are 103 basic tools and 13 major pieces of equipment used in the food industry, and students must be acquainted with all of them.

Dining room service is an integral part of the restaurant practice class, and for actual experience they operate a small restaurant for the teachers at Willow Street and occasionally serve small groups of visitors. Prices in the restaurant are set just to cover the expense of the food itself. The students prepare the food, set the tables, take orders and serve the food. There are usually eight items on the daily menu, according to Eshleman, ranging from soup and sandwiches to chef's salads and more hearty entrees.

To accomplish the daily chores associated with the restaurant, students are divided into four groups - some work on entrees, some on the soup and salads, some in the dining room and some have to do that omnipresent job - pots and pans.

When asked if it's true that the best bakers and chefs are men, Byers said; "I've trained a lot of women, and a lot of good bakers are women. But one drawback for women is that large scale baking is heavy work. There is a lot of lifting and carrying." Eshleman agreed, and said diplomatically, "Both can be good." He went on to illustrate how heavy the huge cooking pots become when filled and agreed that the large equipment and really hard physical work are two reasons there are so many men in the field.

Greg Mongeau (left) McCaskey senior, and Keith Douts, Penn Manor junior, prepare baskets of bread for the tables in the restaurant. The many bread varieties are homemade.

While the huge kitchen and baking area are bustling with activity, there is yet another area which is used for food service at Willow Street - the regular cafeteria which feeds between 500 and 600 students daily.

Presiding over that domain is Mrs. Nancy Weiss, RD6, Lancaster. Here the work area is larger, but somewhat quieter with six people assisting regularly in preparing the day's menus. Mrs. Weiss has been with the Vo-Tech school since it opened, and before that worked in the Lancaster

(Continued On Page 28)

Students fashioned this very scaley alligator out of "dummy dough". Mr. Eshleman says there is nothing to spoil, and such creatures are interesting centerpieces for buffet tables. This particular alligator was used as a centerpiece for open house at the school.

# Gourmet Cooking

(Continued From Page 26)

Township schools.

She says it is her job to plan the menus, and admits that it's becoming a little more difficult with the ever-increasing cost of food. In addition to the a la carte meal there is also a soup and sandwich menu. The mother of three, ages 14, 12 and 10, Mrs. Weiss says with a laugh, "Home cooking is totally different," and says her children "often have suggestions for the cafeteria." She gets some professional advice and guidance from the Red Rose Food Service Association which is made up of people in the food service industry.

Besides doing all the cooking for those 600 people, Mrs. Weiss says she "sometimes even bakes bread." One hint she offers for making uniform rolls in quantity is that she scoops the dough with an ice cream scoop.

Occasionally Mrs. Weiss borrows students to assist in her work, and she sometimes needs to share refrigerator or freezer space with them. But she said it usually doesn't work out for her to plan to use any of their foods or baked goods in the cafeteria because the timing is rather difficult. She says she enjoys working with the students and feels they have a "good opportunity."

Food preparation on a large scale is not all hard work, and the teachers give the opportunity for some creative fun along with the learning. When I visited, preparations were under way for their annual open house for which this department was supplying the refreshments. In addition to baking 10,000 cookies, one big project underway was the creation of a huge snake which had been molded out of "dummy dough" and was being prepared for baking. Eshleman explained that the dough is a mixture of flour, water, shortening, salt and two eggs which is easy to mold and makes attractive creatures which can be used to enhance a buffet table. He said there is "nothing to spoil" and the creatures last for weeks. The results were incredibly realistic.

In another area two students were carving a punch bowl - from a large chunk of ice - an interesting way to solve the problem of ice cubes to keep the punch cold. Ice sculpturing is offered to those students who have the talent and the interest.

A cake shaped like a cross and beautifully decorated for Easter was another project being prepared for open house. It was disappointing to learn that the frosting was simply applied to a frame and there was no cake under it all. Cake decorating for all occasions is one of the features of the bakery class.

Greg Mongeau, a McCaskey senior, was preparing bread baskets for the tables in the restaurant, and said he hopes to work in a bakery when he graduates. His comment to the question of whether he's enjoying his work' "It keeps me out of trouble." He added that he sometimes helps with the family food preparation during holidays, and his favorite job is preparing the turkey.

Keith Douts, a junior at Penn Manor and another would-be baker, was helping with the bread baskets and said, "It's hard work, but I enjoy working on the big mixer and making cakes and doughnuts."

Another Penn Manor student, Greg Leaman, said he helped make small alligators out of the "dummy dough" and added, "I enjoy fooling around with things." He hopes to go into bakery work upon graduation too.

Homemakers - and their husbands - can share in some of the knowledge of the foods department by enrolling in gourmet cooking and cake decorating classes offered ocasionally at Willow Street and other schools.

It's a mouth-watering, hunger-inducing experience to visit the foods department at Willow Street, and it's fascinating to see so many students carrying out so many projects simultaneously. The cake baking, the salad arranging and the ice sculpturing all look like child's play, and the results are truly artistic.

The well-prepared students from the foods department at Willow Street Vo-Tech will be an asset as they enter the food service industry in this county.

**Bread Cubed Steaks**

Cubed steaks mean a quickly-fixed dinner to many working homemakers. As a variation, try them breaded.

For one pound of cubed steaks, use one egg, slightly beaten with two tablespoons of water. Dip steaks in egg, then in cracker meal, then fry in two or three tablespoons of lard or drippings until well browned. After browning, if well done is desired, the frying-pan may be covered and steaks cooked for 10 minutes or until more well done.

# Home on the Range

Cake recipes are emingly most popular in e recipe exchange. Feeling at you are awaiting the blication of your firend's vorite cake recipe, we ing you a variety of cakes bake.

Cake is a versatile dessert, most famous for birthdays and weddings. But they also add a festive touch to any day, especially for the children. I remember the arguments with my seven brothers and sisters over who was going to lick the frosting bowl. It always seemed the one who ended up with the mixing spoon got the most frosting.

**Nothing Crumb Cake**

1½ cups brown sugar
1½ cups flour

Work ingredients together like pie dough until grainy. Remove ½ cup for top crumbs and put aside. To remaining crumbs add:
1 cup buttermilk
1 teaspoon baking soda
1 teaspoon salt
1 egg

Mix well. Pour into a greased 9-inch pie pan and add remaining crumbs across the top. Bake at 350 degrees for 25 minutes, or until brown on top.

New Tripoli RD1

xxx

**Brownie Pudding Cake**

1½ cups sifted flour
1 cup sugar
3 tablespoons cocoa
3 teaspoons baking powder
¾ teaspoon salt
¾ cup milk
1½ tablespoons melted butter
2 teaspoons vanilla
¾ cup chopped walnuts
5 drops red food coloring
½ cup brown sugar, firmly packed
¼ cup sugar
1¾ cups boiling water
3 tablespoons cocoa
Vanilla ice cream

Sift together flour, 1 cup sugar, 3 tablespoons cocoa, baking powder and salt into a bowl. Add milk, butter and vanilla. Beat well. Stir in walnuts and food coloring. Spread batter in greased pan.

Combine brown sugar, ¼ cup sugar, 3 tablespoons cocoa. Sprinkle over batter. Pour boiling water over all. Bake at 350 degrees for 40 minutes or until cake tests done.

Serve warm topped with vanilla ice cream.

Lucy Wenger
Lititz RD2

xxx

**Party White Cake**

2½ cups sifted cake flour
1 - 2-3 cups sugar
2-3 cup shortening
1 teaspoon salt
¾ cup milk

Mix well and add:
4½ teaspoons baking powder
5 egg whites
½ cup milk
1 teaspoon vanilla

Bake at 350 degrees for 30 to 35 minutes.

Mrs. Ivan Zimmerman
Nottingham RD2

xxx

**Tomato Soup Cake**

Cream together:
1 cup sugar
¼ cup butter or margarine
1 egg

Add:
1 can tomato soup
1 teaspoon baking soda

Mix dry ingredients together and add to above liquid:
2 cups sifted flour
1 teaspoon ginger
1 teaspoon allspice
1 teaspoon cloves
2 teaspoons baking powder

Mix thoroughly. Bake at 350 degrees until done.

xxx

**Oatmeal Cake**

1¼ cups boiling water
1 cup oatmeal
½ cup shortening
1 cup brown sugar
1 cup white sugar
2 eggs
1-1-3 cups and 2 tablespoons flour
1 teaspoon soda
1 teaspoon cinnamon
½ teaspoon salt

Pour boiling water over oatmeal, let stand 20 minutes. Cream together shortening and sugar. Add eggs and oatmeal. Sift flour. Add soda, cinnamon and salt to flour. Bake at 350 degrees in loaf pan.

Topping:
6 tablespoons butter
½ cup brown sugar
½ cup sweet cream
1 teaspoon vanilla
¼ cup nuts

Brown butter, add sugar, cream and vanilla. Cook few minutes, add nuts, put on cake while warm.

Mabel Martin
Bird-in-Hand RD1

xxx

**Ginger Cakes**

1 cup brown sugar
¼ cup black strap molasses
1 egg
¾ cup shortening
2 cups flour
2 teaspoons baking soda
½ teaspoon salt, ginger and cloves
1 teaspoon cinnamon

Let stand over night, roll in balls, and then in sugar.

Mrs. Wm. Graybill
New Providence

xxx

**Walnut Cake**

3 eggs
2 cups sugar
½ cup butter
1 cup sweet milk
3 cups flour
1 teaspoon baking soda
2 teaspoons cream of tartar
½ cup nut kernels, chopped fine
½ cup nuts in frosting

Mary Fisher
Gordonville RD1

**Prune Cake**

½ cup shortening
1½ cups sugar
3 eggs, unbeaten
2½ cups sifted flour
1 teaspoon salt
1 teaspoon baking powder
¾ teaspoon soda
½ teaspoon nutmeg
½ teaspoon cloves
2 teaspoons cinnamon
1 teaspoon vanilla
1 cup chopped prunes
1 cup prune liquid
½ cup chopped walnuts

Cook enough prunes to make 1 cup chopped prunes, in 1½ cups water, till prunes are soft. Save 1 cup liquid from cooked prunes. Let prunes cool, then chop.

Cream shortening; add sugar. Beat thoroughly. Add eggs, one at a time. Add salt, soda, baking powder, and spices. Then add flour alternately with prune liquid and vanilla. Beat thoroughly after each addition. Fold in chopped prunes and chopped walnuts.

Pour into a greased loaf pan. Bake at 350 degrees.

Elsie Z. Nolt
New Holland RD1

xxx

**Shoo-fly Cake**

4¼ cups flour
1 pound brown sugar
1 cup butter
1 cup molasses
2 cups boiling water
2 teaspoons soda

Combine flour, brown sugar and butter, work into crumbs. Reserve one and one-half cups of mix for topping.

Mix water, molasses and soda, add to remaining crumbs, mix well, or until batter is very thin. Pour into greased, floured pan. Sprinkle the one and one-half cups crumbs on top. Bake at 350 degrees for 45 minutes. Stays moist.

Mrs. Daniel Z. Weaver
New Holland RD1

# LADIES HAVE YOU HEARD?

By Doris Thomas, Extension Home Economist

**Tips on Working With Corduroy**

Corduroy--cord of the king! At least that's what the French called it when the fabric was invented back in 17th centruy France. Corduroy is still valued for its rugged, practical uses. But today we have so many varieties of corduroy that we are more apt to choose it because of its beauty.

Today's corduroy is available in narrow and wide wale, with no ribs at all and many variations in between. Some are printed, others are plain, but they all have one thing in common. They are pile fabrics, which means they have extra threads in the weave. In the case of corduroy, these are cut and brushed in one direction to create a nap.

Because of the nap you must place the tops of all pattern pieces in the same direction of the nap when cutting. If not, they will show a color difference caused by the way the nap reflects light.

Which direction should the pile or nap fall? Designers use the nap in either direction and sometimes cut the garment on the crosswise grain. The important thing to remember is that all the pieces have the nap placed in the same direction. Most manufacturers suggest that corduroy be cut so that the nap falls down on the body. This way, the fabric will appear darker. However, you may find the color more becoming if the nap is placed in the other direction. Hold the fabric up to you to see which effect is more pleasing.

Corduroy has a tendency to make the figure appear larger, so it may not be the best choice for everyone. The ribs or wales in the fabric will affect your choice of a pattern. Choose a simple style with an absence of detail. Diagonal darts will cause an apparent distortion of the wales which is more apparent on wide wale and on plain colored corduroy.

Choose a style with a zipper closure rather than buttons or buttonholes. It is possible to make bound or worked button holes in this fabric, but each has some problems.

If possible, plan construction details to eliminate bulkiness. Make facings from a lighter-weight fabric that is compatible with the care required for the corduroy. Don't turn under raw edges of hems or facings. Leave them flat for apparent smoothness on the outside of the garment.

Try to avoid top stitching. The ribs of the fabric make it difficult to stitch a perfectly straight line, unless the stitching follows one of the ribs.

Experiment with pressing. Usually light steam pressing on the wrong side of the fabric will be enough. Heavy pressure of the iron can flatten the nap and leave seam impressions on the right side of the fabric.

Most corduroy fabrics can be machine washed and dried, but check care directions first. The fabric will retain its new appearance longer with dry cleaning.

**Tips On Choosing Firewood**

Choosing the firewood to burn in your fireplace is much like selecting a favorite wine or cheese. At least, that's the notion put forth by some of the Forest Service specialists of the United States Department of Agriculture. Their reasons are that each species of wood can offer something different in aroma or heat value.

Softwoods, such as pine, spruce and fir are easy to ignite because they are resinous. They burn rapidly with a hot flame. However, a fire built entirely of softwoods–just like a fire of scrap paper–burns out so quickly that it requires frequent attention and replenishment. If you want only a quick warming fire or a short fire that will burn out before you go to bed, then softwoods are a good choice.

For a longer fire, use softwoods in combination with the heavier hardwoods such as ash, beech, birch, maple and oak. These hardwoods burn less vigorously and with a shorter flame. Oak gives the most uniform and shortest flames and produces steady, glowing coals.

You get aroma from the woods of fruit trees such as apple and cherry, and nut trees such as beech, hickory and pecan. Their smoke generally resembles the fragrance of the tree's fruit.

By mixing softwoods with hardwoods you can get an easily-ignited and long-lasting fire. Later, by adding some fruit or nut woods, you can capture the nostalgic wood smoke aroma as well.

**Try A Classified Ad It Pays!**

**Baseball Pitcher**

He read about a baseball pitcher who made over $100,000 last year. This pitcher lost nine games out of eleven, hit .067, but does a great shaving cream commercial

**Cheater?**

I won't say he cheats, but he won't go bowling anymore. After all, who can tilt an alley?

**Space Program Funding**

Have you ever given this some deep thought What if we're paying those astronauts by the mile?

INDIVIDUAL CALF STALLS

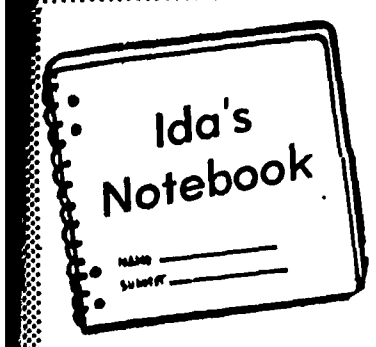
This is the successful stall for raising calves in environmental controlled barns. Veal — Dairy Beef — Herd Replacements. Stall size — inside 22 x 48; outside 22 x 60.

Advantages of the Frey elevated calf stalls: Reduced labor, Eliminating bedding, Controlled feeding, Lowering cost per calf, Reduce Calf losses, Cut stall upkeep to a minimum, Healthier calves. In short, better management, Inereased profits.

WHY NOT ORDER YOURS TODAY

FREY BROS.

R D 2 QUARRYVILLE, PA PHONE 717-786-2146



Ida Risser

The daffodils, hyacinths and crocuses are all pushing up green shoots through the dead leaves and grass. Even the maple tree buds are really swelling. But somehow, I feel we will still have quite a bit of winter weather.

Therefore, I've gathered some of my pussy willow branches and forced them in the house, and now their silvery, velvetlike catkins are open on the kitchen table. Added to them are the delicate bright yellow blooms of the forsythia. They are reminders that spring will come eventually.

xxx

Everyday we read of the problems and financial difficulties of mass transportation in Lancaster County. Recently, I've been reading correspondence written on cards in the early 1900's and was surprised at the importance of trolley cars in the lives of rural people. So I decided to a bit of research on early trolleys.

The first cars were pulled by horses from 1875 to 1890 and straw kept the passenger's feet warm in winter. In summer there were open cars which took people direct to the fair or circus. There were many branch lines and the Columbia and Donegal Division opened in 1893. Then there was also the Millersville-Pequea ride which could be taken to the revival meeting at Rawlinsville camp meeting.

The first electric car ran to the city limits in 1890. In 1895 the "daft control" car was used and passengers agreed with the name as they sometimes landed on the floor after a sudden stop, caused by throwing the machinery in reverse. Many worn-out trolleys were taken down the Rocky Springs line and burned for junk metal in the '30's.

Buses wrote "end of the line" for Ephrata trolleys, last in the county, in the 1940's.

**Pigs As Wealth?**

The Tifalmin people of New Guinea consider pigs as wealth in themselves. The donor of a pig acquires not only prestige but credit, and expects a pig in return on some future occasion

**Designed For Blockade**

To blockade southern ports in the Civil War, the Federal Government asked shipbuilders to design a warship with shallow draft that could enter rivers, fire in any direction without having to come about, and would be armored against artillery fire from the shore The result was John Ericsson's "Monitor," whose revolving gun turret was copied by the world's navies

# Farm Women Societies

## Society 14

Farm Women Society 14 met recently at the home of Mrs. Everett Newswanger, 1753 Lincoln Hwy. East. The group voted to help support the proposed county project of donating to the J. C's. newly acquired camp for retarded children. The program was a nonsense sale netting $81.75.

On February 27 at 2:00 the members, families, and friends will meet at the Hickory Farms of Ohio, Park City, to tour and taste. Let Mrs. Paul Hostetter, RD1, Strasburg know if you will be attending the Hickory Farms Tour.

Other hostesses included Mrs. Ira Rutt, Mrs.Robert Rowe and Mrs. Willis Rohrer.

The next regular meeting will be held on March 13 at the home of Mrs. Maurice Herr, Refton, Pa. The program will feature Mr. Herr and his music boxes.

## Society 31

Farm Women Society 31 approved a $25 donation to the Solanco Meals on Wheels at its recent meeting at the home of Mrs. Kenneth Rutt. The group selected Camp Jaycee for the county project.

Announcements were made of a sale April 4 at which the society has the refreshment stand, and the Spring Rally May 8. It will be held at Memorial Hall on the York Fair Grounds. The $5 reservations must be in by April 15.

Mrs. Harry Spayd and Mrs. James Kreider reported on the state convention.

The program was guessing baby pictures and seeing the slides from past meetings.

The next meeting will be held at the home of Mrs. James Groff and each member is asked to bring a blanket on which to do exercises.

## About Stain Removers

Some stains require only one type of stain remover and frequently you need to use two or more. It's wise to keep three general types of removers on hand—soaps or detergents, solvents and bleachers.

Water, or water with a detergent added, is the most useful solvent for many nongreasy stains. Water is the only solvent that is neither flammable nor poisonous.

Acetone, amyl acetate, alcohol and turpentine can be used for stubborn nongreasy stains. But don't use acetone or nail polish remover on acetate, triacetate or modacrylic fibers because they will "melt" the fibers.

Carbon tetrachloride, perchloroethylene and trichloroethylene are non-flammable grease solvents. All are poisonous and must be used in a well-ventilated place.

Soaps and synthetic detergents will remove many nongreasy stains and almost all greasy stains. Acting as a lubricant, detergents coat insoluble particles so they are easily rinsed out of the fabric. Concentrated detergents, such as liquid synthetic shampoo are easy to work into the fabric and easy to rinse out.

Bleaches are widely used in stain removal. They remove color from the stain making it invisible. Because a bleach may damage fibers and fade dyes, carefully follow the directions for its use.

Steam press the garment or article you are working on only when you are sure the spot has completely disappeared and is thoroughly dry.

## Thought For Food

**Shrimp-Stuffed Mushrooms**

Rinse, pat dry and remove stems from 1½ pounds fresh mushrooms (save the stems for use in soups, stews, etc ) In a large skillet heat 4 tablespoons butter or margarine Add mushroom caps and saute 5 minutes, turning occasionally Remove mushrooms to baking pan, cap side up; set aside In the same skillet saute ¼ cup chopped onion or scallions Add 1 jar (2¾ oz ) tiny shrimp, drained and diced, ¼ cup mayonnaise, 1 hard-cooked egg, finely chopped, 1 tablespoon prepared hot mustard, ¼ teaspoon lemon juice, ¼ teaspoon lemon juice, ¼ teaspoon salt, 1/16 teaspoon ground red pepper; mix well Fill sauted mushroom caps with shrimp mixture Bake in a preheated hot oven (450°F.) 6 to 8 minutes Serve hot Yields approximately 30 stuffed mushrooms.

**She can't afford to eat hay.**
**And you can't afford to feed it.**

If she is under two months of age, a dairy replacement heifer should have no hay whatsoever in her ration. Hay is too difficult for her underdeveloped rumen to digest. Hay doesn't have the nutrition required for proper growth and development; it takes up rumen space that should be filled with a high quality feed such as Purina Calf Startena.®

No, a very young dairy replacement heifer can't afford the shortcomings of hay. And neither can you — if building maximum milk production is your goal.

**Would you want to jeopardize Calf Startena benefits?** When fed as recommended, Calf Startena provides a "just right" balance of nutrients. Its low-fiber, high-energy formula is more easily digested, and at the same time it stimulates papillary development in the rumen. In addition, improved growth and feed efficiency are helped by a proven antibiotic additive.

Your Purina dealer has some mighty interesting facts about the superior performance of Calf Startena, including test results which show a 19 percent faster growth rate for heifers fed a hay-free ration. Be sure to see your Purina dealer — and this important information — before you start that next group of replacements.

Dear Livestock Farmer;

Dr. Cloy Knodt tells us that a ton of good quality alfalfa haylage containing 40% moisture and 20% crude protein on a dry matter basis can be an excellent source of protein and considerable economic value. Such haylage contains enough crude protein to equal that of 545 lbs. of 44% protein soybean meal which would cost $54.50 ($200.00 per ton) or $65.40 ($240.00 per ton). Therefore, alfalfa haylage can easily be worth $50 to $65 per ton just for its crude protein value as compared to buying soybean meal.

Sincerely yours,
Dick Enck

# Sperry Promotes Happe

Melvin J. Happe has been named vice president for engineering, North America, for Sperry New Holland according to an announcement made by company president Kenneth F. Thompson.

He succeeds H. G. McCarty who has been named vice president and general manager of the company's North American Division. Both appointments will become effective March 4.

In his new position, Happe will be responsible for Sperry New Holland's engineering activities throughout North America. He has headed engineering operations in the European

Melvin J. Happe

operations in the European Division, with headquarters in Zedelgem, Belgium, since 1971.

Happe began with Sperry New Holland in 1947 as a design engineer, a position he held for two years. From 1949 to 1958, he served as a senior engineer for several product lines. He was product test manager from 1958 to 1967, when he became engineering manager for combines in Belgium, a position he held until 1971.

A native of Carroll, Iowa, Happe was graduated from Iowa State University with a Bachelor of Science degree in Agricultural Engineering. During World War II, he was in the U. S. Army Corps of Engineers and attained the rank of major.

He is a registered professional engineer and was active in the Pennsylvania Society of Professional Engineers before going to Europe. He became a member of the American Society of Agricultural Engineers in 1941 and has served that organization in a number of positions on both the state and national level.

While a resident of New Holland, Pa., from 1947 until 1967, Happe was active in civic affairs, serving as president of the New Holland Kiwanis Club in 1959, as chairman of the Borough Planning Commission from 1960 to 1965, and as president of the New Holland Community Park Association for two years.

Happe is married to the former Marian Van Meter of Chicago, Illinois, and they have five children.

# UEP is seeking Nominees for "Eggman of the Year"

Nominations for "Eggman of the Year" are now being received by United Egg Producers. The award, officially named the Maurice M. Stein Award in 1973, will be presented at the U.E.P. annual meeting early in April.

Jerry Bookey, U.E.P. president, said egg producers and allied businessmen active in the egg industry, are invited to send nominations for "Eggman of the Year" to the U.E.P. office in Atlanta before March 22. Nominations may be made for any currently active egg producer who the nominator feels exemplified outstanding national leadership in the egg industry during the past year.

Bookey said nominations submitted for the first annual Stein Award presented in 1973 to Maurice Pickler of New London, N. C., were reviewed by the editors of the egg industry's leading publications. These editors made the final selection from nominations submitted by producers from across the United States. Bookey said he would request these editors to review this year's nominees, also.

Nominations should be mailed to' "Eggman of the Year", 1001 International Blvd., Suite 1105, Atlanta, Georgia 30354. Nominations must be received by March 22.

## Book Herd Cited

Milk and butterfat production levels established by Registered Holstein cows in this area have been reported by Holstein-Friesian Association of America. All cows are from the herd of Roy H. and Ruth H. Book, Roaring Maples Farm, Ronks RD1, and are enrolled in the DHIR official testing program.

Cows recognized for their exceptional food producing ability are:

Roaring Maples Flashy Freda, age 6-3, 20,240 pounds milk, 748 pounds butterfat, 3.7 percent test in 320 days milked; 19,570 milk, 721 butterfat, 3.7 percent test in 305 days.

Roaring Maples Archie Ann, 7-5, 18,090 milk, 717 butterfat, 4.0 percent test in 335 days; 17,260 milk, 681 butterfat, 3.9 percent test in 305 days.

Roaring Maples Della Kate, 9-2, 20,170 milk, 669 butterfat, 3.3 percent test in 341 days.

Roaring Maples Marc Edith, 4-7, 15,150 milk, 660 butterfat, 4.4 percent test in 282 days.

Roaring Maples Bonus Beauty, 2-11, 16,450 milk 654 butterfat, 4.0 percent test in 309 days.

Roaring Maples Della Kate, 9-2, 18,970 milk, 627 butterfat, 3.3 percent test in 305 days.

**Painting Tip**

If you're painting a room, remember that paint generally dries to a slightly different color or shade For a fast preview of the final color, brush a sample swatch of paint on a piece of clean, white blotting paper The paper will immediately absorb the wet gloss and the color on the paper will be about the color of the paint when it dries on the wall

# Pa. Broiler Placements Down 3 pct.

Placements of broiler chicks in the Commonwealth during the week ending February 16, 1974 were 1,096,000. The placements were 3 percent below the corresponding week a year earlier, and 17 percent below the previous week. Average placements during the past 10 weeks were 4 percent above a year earlier.

Settings for broiler chicks were 1,997,000 - 12 percent above the previous week and 1 percent below the comparable period a year earlier. The current 3-week total of eggs set is 1 percent above the same period a year ago.

Inshipments of broiler-type chicks during the past 10 weeks averaged 1,000 compared with 8,000 a year ago. Outshipments averaged 250,000 during the past 10 weeks, 8 percent above a year earlier.

Placements in the 21 States were 58,636,000 - 2 percent below the previous week and 2 percent above the same week a year earlier. Average placements during the past 10 weeks were 4 percent above a year ago.

Settings were 77,101,000 - 2 percent above the previous week and 4 percent above a year earlier. The current 3-week total of eggs set is 4 percent above the comparable period a year ago.

Ephrata Area Young Farmers installed their new officers at the group's recent annual dinner meeting. The new officers are, left to right: Glenn M. Miller, Stevens RD1, secretary; Earl G. Martin, Ephrata RD2, 1974 president; Luke R. Zimmerman, Ephrata RD2, treasurer; John R. Zimmerman, Ephrata RD1, vice president; Roy Buch Jr., Ephrata RD2, public relations director; and Marvin R. Sauder, Ephrata RD2, retiring president.

**Bohemian Beef Dinner**
**2 pounds beef for stew, cut in 1-inch cubes**
**2 tablespoons flour**
**1 teaspoon salt**
**¼ teaspoon pepper**
**2 tablespoons cooking fat**
**2 medium-sized onions, sliced**

**A HOME BRED HERD**

20 fresh within past 45 days, 10 heavy with calf; 22 bred for next Sept. & Oct., milking real good, 6 due to freshen in late summer, 2 pasture bred heifers.

This is nearly 100 percent sire powered herd with 12 daughters of Whirlhill Kingpin, A Citation Sovereign, Rocby Ivanhoe Dina Charm, Walhowdon President Vernon, Heatherstone Lucky Typeblazer, Maview Dunloggin Direct and the remaining herd from top proven sires.

This herd was established many years ago from his father's herd, Fay Teel, he was widely known for top production Holstein cattle.

These animals are large, beautifully uddered and outstanding in every respect. Now is the time to buy these good producing cows and are bred back for next fall. Many are producing 70 to 88 lbs. of milk daily with a herd average of nearly 50 lbs. per cow. The 1973 creamery herd average was 14,000 M., 3.8 percent F. Attend this sale where every animal was raised on this farm from high production dams. The majority are all young and will please any good dairyman.

Health — all 30 day TB & blood tested free herd. Interstate & Pa. health charts. Calfhood vaccinated. Vaccinated for I.B.R. for the past 3 years & injected for shipping fever. Pregnancy examined by local vet.

# Grange 66 Plans Future Meetings

Fulton Grange 66 held their regular meeting February 11, at the Grange hall in Oakryn with the Master C. G. McSparran presiding. The Charter was draped in memory of Peter S. Fry.

The Women's Activities committee chairman, Mrs. William J. Rhoades, announced the sewing contest for Grange members or contestants sponsored by Grange members. The contest runs February through April 30.

J. Everett Kreider and Richard B. Lefever will attend a prehearing in the York Co. courthouse by the Atomic Energy Commission March 11, 1 P.M.

Gyles Brown and David Wissler were appointed in charge of advertising and tickets for the annual turkey supper April 6 at the Grange hall.

The Pa. State Grange will hold regional meetings for Masters, Lecturers, Secretaries and chairmen of Women's Activities committees of this area the evenings of Feb. 25 at Kutztown Grange hall and March 4 at Perry Valley Grange hall near Millerstown.

Lancaster Co. Pomana Grange has arranged the following visitation meetings: March 19 at Quarryville Fire Hall, Colerain Grange host, wtih Fulton Grange presenting the program; April 2 at White Horse Fire Hall, Colerain Grange presenting the program and May 13 at Fulton Grange hall, Salisbury Grange presenting the program. The theme of these meetings is "Goals."

The Young Married committee, Mr. and Mrs. David Knight, Mr. and Mrs. Larry Myers and Mr. and Mrs. David Miller, presented the program. Mrs. Knight conducted a St. Valentine's Day game, won by Mrs. Clifford Holloway Jr. and David Hanks, and a Lincoln-Washington game won by Mrs. Richard Hanks. Glenn Hough gave the origin of St. Valentine's Day. Taking part in a descriptive game were: Mr. and Mrs. Clifford Holloway Jr., Mr. and Mrs. Thomas Galbreath, Mr. and Mrs. Richard Hanks, Miss Joyce Galbreath and Clifford Holloway III. Mrs. W. Harold Graybeal gave a reading "Cold Feet." The following took part in the Newly Wed game: Mr. and Mrs. Charles Reed, Mr. and Mrs. Norman Wood, Mr. and Mrs. Gyles Brown and Mr. and Mrs. DeWitt Bacorn. Mrs. Thomas Galbreath exhibited silverware, a cookie jar and saucers which wer over 100 years old

Rev. Earl Ziegler and family will present a play at the next meeting Feb. 25.

# Eshelman Facilities Are Sold

G. A. Ensminger, President of Albers Milling Company, and Herb Eshelman, President of John W. Eshelman and Sons, have announced that Albers is buying for cash five Eshelman mills located at York, Pennsylvania; Circleville, Ohio; Sanford, North Carolina; Chamblee, Geogia; and Tampa, Florida. These mills currently serve 1,200 "Red Rose" dealers for the east and south, as well as a considerable number of bulk customers.

The purchase also includes the Eshelman feed stores in Pennsylvania, Vermont, Connecticut and Ohio. Under Albers ownership they will also serve as warehouse points for Specialty Feed distribution to jobbers

Ensminger stated, "The opportunity to acquire these mills places Albers in a most advantageous position to improve service to our jobbers, dealers and feeders in a 21-state area. It is our plan to continue to work through our present distribution in the areas previously served by Eshelman.

"The increasing demand for Albers Specialty Products," Ensminger continued, "principally Calf Manna, Suckle Milk Replacer, horse concentrates, and Lab-Mixes, has outgrown the capabilities of our Kansas City plant, even though we have increased the capacity of that plant six times over since 1950 This demand for Albers products, combined with problems in shipping from the one Kansas City location, has required an expansion of our milling facilities in the east and south."

Eshelman produces a complete line of livestock and poultry feeds, as well as pet foods, under the "Red Rose" label This product line will be maintained, and no changes are contemplated in plant or sales personnel

# County Agent Reviews Milk Market Channels

Figures made available by the Lebanon County Agricultural Extension Service throw light on the marketing channels used by local farmers in selling milk.

There are approximately 278 farmers marketing milk in the county. Of this number, 267 are marketing milk to plants regulated under Federal Milk marketing orders. The remianing 11 producers are selling milk to dairy plants that are regulated by the Pennsylvania Milk Marketing Board.

Assistant County Agent Newton Bair indicates that Federal milk marketing orders are increasingly more important in regulating prices paid to Pennsylvania farmers for milk.

Federal orders affecting Pennsylvania producers are the Mid-Atlantic essentially regulating the Philadelphia, Southern New Jersey, Baltimore and Washington markets, and the New York-New Jersey Order covering major markets in New York State and Northern New Jersey and the Eastern Ohio-Western Pennsylvania market which covers the western part of the state.

About 181 farmers in the county ship to plants regulated under the New York-New Jersey Order, and 86 ship to the Mid-Atlantic Order.

Award winners at the recent annual meeting of the Ephrata Area Young Farmers paused for a photograph at the end of the meeting. The winners, left to right, and their awards, are:

Kneeling: Warren Bollinger, Lititz RD4, Community Service; Earl Smoker, Stevens RD1, Community Service; Harold Greenly, Ephrata, Appreciation Award; Paul Bollinger, Myerstown RD2, Keystone Award.

First row standing: Alvin K. Bollinger, Lititz RD4, Active Member Award; Mrs. Warren Bollinger, Lititz RD4, Community Service; Mrs. Earl Smoker, Stevens RD1, Community Service; Mrs. Paul Bollinger, Myerstown RD2, Keystone Award.

Rear: Irvin Graybill, Jr., Stevens, RD1, Outstanding Farmer Award; Earl C. Stauffer, Ephrata RD1, Dairy Production Award; Marvin R. Sauder, Ephrata RD2, Active Member Award; Tom Zartman, Ephrata RD1, Forage Production Award; Galen Crouse, Stevens RD1, Dairy Production Award; Paul S. Horning, Stevens RD1, Dairy Production Award; Henry E. Givler, area vo-ag consultant, Appreciation Award winner.

# Lebanon Co. Conservation Cooperators

# Clean Streams Law To be Discussed At Final Hinkletown Meet

The last in a series of meetings sponsored by the Eastern Lancaster County Adult Farmer Program will be held on Wednesday evening, Feb. 27, at 7:30 in the Hinkletown Elementary School just off Route 322 near Martindale. This meeting will center upon a discussion of the Clean Streams Law and how it affects the farmers of Lancaster County. Members of the panel to discuss this law will include George Parks, Consultant for the Water Quality Board of the Department of Environmental Resources; Orval Bass, District Conservationist for the Lancaster County Soil and Water Conservation Service; and Henry Hackman, Executive Secretary of the Lancaster County Soil Conservation District.

The State of Pennsylvania has recently passed a Clean Streams Law which has provisions which must be met by every farmer no later than July 1, 1977 and these provisions affect each and every farmer of Lancaster County. Among the topics which will be covered in the discussion by the panel are: The requirements of the new law; how these requirements can best be met by the local farmers; the types of help available to the farmer; and the time requirements and penalties of the new law.

No farmer can afford to remain uninformed about the far-reaching provisions of this new law or complacent about the 1977 deadline or they may find themselves facing the stiff penalties of this new law.

All farmers are urged to attend this meeting.

# Co-op Seeks Hike In Milk Price Supports

A spokesman for farmers who produce most of the nation's milk supply today called for a 30 per cent rise in milk price supports on April 1 with further increases following if production costs keep rising.

Patrick B. Healy, Secretary of the National Milk Producers Federation, said the national farm co-op group is asking the Agriculture Department to raise milk supports for the new marketing year beginning April 1 to the legal ceiling, 90 per cent of the "fair earning power" parity price.

If Agriculture Secretary Earl L. Butz accepts the advice, supports would be raised from the present $5.61 a hundredweight to $7.30 a hundredweight. Healy said that unless the increase is ordered, domestic milk production will fall about 3 billion pounds short of demand and leave consumers "at the mercy of unreliable foreign sources."

Healy also distributed notices of the federation's stand, which will be sent to Butz, to individual dairy cooperatives comprising the federation membership. They were urged to send similar appeals to Butz and to members of Congress from their areas.

Raising the milk support to $7.30 a hundredweight would leave the prop, which applies to manufacturing-grade milk, still below the current market price. But it would give farmers a stronger safeguard against potential future declines.

Even if Butz rejects the dairymen's plea and sets supports at the minimum 80 per cent of parity permitted by law on April 1, they would still get an increase. Eighty per cent of parity this April is expected to equal about $6.50 a hundredweight, 14 per cent above the current support.

Healy said that in addition to setting the support at 90 per cent of parity on April 1, the Agriculture Department should adjust it periodically to keep it at the same relationship to parity.

## *Organic Farming Expert to Speak In Harrisburg*

C. J. Fensau, an organic farming advocate and consultant, will discuss his methods of farming with a minimum of fertilizer, tillage and pesticides at a public meeting in Harrisburg on Tuesday, March 5. There'll be two sessions during the day, the first at 1:00 p.m. and the second at 7:00. Both meetings will be held in Room 309 of the Pennsylvania Department of Agriculture Building, across the street from the Farm Show Building.

There will be time after each session for questions, and participants are urged to bring their lunch. The meeting is being sponsored by the Pennsylvania Organic Farmers and Consumers Organization. For more information or transportation to the meeting, call Paul Hartz, Morgantown, 215-286-5268; Leon Rex, 215-767-3293; Glenn Swartz, Juniata County, 717-734-3761; or Richard Dunkelberger, Hamburg, 215-562-8328.
